AI Cartoon Series — Golu & Chiku

# Course Notes

Poore course ke notes — har lesson mein kya seekha, steps, galtiyan aur aaj ka kaam. Running example: Golu & Chiku, Episode 1 "Chiku Aur Gayab Laddoo" aur rhyme "Chiku Ki Chhalaang".

## Course ka poora raasta

Characters (sheets) → duniya (locations) → kahani (scene table) → pehla scene (start frame + Frames mode) → poora episode awaaz ke saath → rhyme video + troubleshooting → edit, thumbnail, publish → series plan.

Tools: **chat G.P.T** (characters, prompts, kahani, production sheets, title), **Google Flow** (Nano Banana Pro images, Video — Frames aur Ingredients), **CapCut** (jodna, title card, music, export).

Course ka golden rule: **pehle lock, phir animate** — character sheet, Master Style line aur location image har baar.

## Lesson 01 — Course Intro

- Cold open: presenter khud cartoon ban jaati hai, right se bahar bhaagti hai, aur asli roop mein left se wapas aati hai.
- Course kya hai: AI se apni khud ki cartoon series — bachchon ki kahaniyan aur rhymes.
- Kiske liye: parents, teachers, aur jo bachchon ka YouTube channel shuru karna chahte hain.
- Kya chahiye: drawing ya animation aana zaroori nahi — sirf laptop, Google Flow aur chat G.P.T.
- Poore course mein ek series saath banegi: **Golu & Chiku** — end mein apna pehla episode.

### Aaj ka kaam

Socho tumhari series kis umar ke bachchon ke liye hogi — 3, 5 ya 8 saal?

## Lesson 02 — Golu Ka Janam (Character Sheets)

- chat G.P.T se dono characters design karwaye: Golu "The Little Explorer" (yellow t-shirt, blue shorts, red sandals, catchphrase "Arre waah! Ye kya hai?") aur Chiku "The Tiny Troublemaker" (catchphrase "Chik-chik! Pakdo mujhe!"). Har rang ka exact hex code bhi mila.
- Usi chat se sheet ke prompts likhwaye — copy, Nano Banana Pro mein paste: 4 views (front, three-quarter, side, back) + 4 expressions.
- chat G.P.T ne ek **Master Style line** di — yahi line har image aur video prompt mein jaati hai.
- Test: dono sheets reference mein daal ke seedha video banaya — Golu aur Chiku dono same rahe.

- chat G.P.T ka note: sirf text prompt se character same nahi rehta — sheets save rakho.

### Galti + fix

Bina sheet ke "A cute Indian boy named Golu..." likha — bilkul alag 2D bachcha aaya, shirt pe naam tak likh diya. Fix: hamesha sheet/location reference + Master Style line.

### Aaj ka kaam

Apne character ki sheet banao.

## Lesson 03 — Golu Ki Duniya (Locations)

- chat G.P.T se 3 locations ke prompts: ghar (living room), mohalla (gali), school (classroom). Har prompt Master Style line se shuru.
- Locations khaali rakho — koi character nahi. Yahi tumhare "sets" hain.
- Test: Golu ki sheet + Chiku ki sheet + ghar ki image, teeno reference mein — video mein sofa, deewar, Golu sab same.
- chat G.P.T ki tip: har scene mein us jagah ki image reference mein daalo, warna khidki-darwaza badal jaata hai.

### Galti + fix

"Golu's house in India." bina style line aur reference ke — cartoon nahi, asli purani gali ki photo aa gayi. Fix: hamesha sheet/location reference + Master Style line.

### Aaj ka kaam

Apne character ki teen jagahein banao.

## Lesson 04 — Kahani Likho

- Usi chat mein pehla episode: **"Chiku Aur Gayab Laddoo"** — ek laddoo gayab, Golu ko lagta hai Chiku ne khaaya, sach kuch aur nikalta hai.
- Kahani ko 8-8 sec ke 8 scenes mein toda: location, characters, ek action, chhota dialogue, camera.
- chat G.P.T ne saare scenes ghar mein rakhe — kam locations = animation aasan aur consistent.
- Kid check: laddoo galti se plate se gir ke roll hota hai, Golu daantta nahi pyaar se poochhta hai, Chiku furniture ke peeche nahi bhaagta, moral: "Bina jaane kisi ko dosh mat do."
- Baareek baat: gira hua laddoo koi nahi khaata — bachche yahi dekh ke seekhte hain.

### Galti + fix

Nayi chat mein sirf "Bachon ke liye ek kahani likho" — Golu-Chiku gayab, koi random khargosh aa gaya. Fix: hamesha sheet/location reference + Master Style line.

### Aaj ka kaam

Apne character ki pehli kahani ke scenes banao.

# Lesson 05 — Pehla Scene Chala

- Pehle **start frame**: chat G.P.T se Nano Banana prompt (Golu sheet + ghar image) — scene ka bilkul pehla moment.
- Phir usi image ko chat G.P.T mein upload karke Scene 1 ka video prompt: ek action, abhi koi dialogue nahi.
- Flow → Video → **Frames** mode → start frame + prompt → 8 sec. Golu move karta hai, kamra same rehta hai.
- Scene 2 bhi same tareeke se.
- Pro tip: start frame ka style zara bhi alag dikhe toh trash karo aur dobara generate — video usi frame se banta hai.

### Aaj ka kaam

Apni story ke pehle do scenes banao.

# Lesson 06 — Poora Episode, Awaaz Ke Saath

- Ek hi message mein: **voice bible** (Golu, Chiku, narrator — har ek ki ek fixed English voice line) + 8 scenes ki **production sheet**.
- Har scene: start frame prompt ya "Use last frame of Scene X", aur video prompt — dialogue, voice line, TIMING, "only [character] speaks".
- Pro trick: jo scene pichhle se continue hota hai, uska start frame pichhle video ka last frame.
- 1–2 scenes on camera, baaki off camera — phir aathon scenes jod ke 64 sec ka poora episode.
- Scene 8 mein narrator moral bolta hai.

### Aaj ka kaam

Apni story ke saare scenes voices ke saath banao aur poora episode chalao.

# Lesson 07 — Rhyme Video + Troubleshooting

- Original rhyme **"Chiku Ki Chhalaang"** — 4 verse, har verse 2 lines, 8 sec mein gaane laayak, mohalla mein.
- Production sheet: 4 clips; Clip 2–4 ka start frame pichhli clip ka last frame — poori rhyme ek flow mein.
- Golu saare verse gaata hai, Chiku act karta hai. Har clip mein tune thodi badal sakti hai — music baad mein CapCut mein.
- Troubleshooting table: problem, kyun hoti hai, aur prompt mein kaunsi line daalni hai.
- Golden rule: characters lock karo, jagah lock karo, aur sirf utna animate karo jitna scene mein chahiye.

### Aaj ka kaam

Apni original rhyme banao aur troubleshooting table save karo.

# Lesson 08 — Edit, Thumbnail, Publish + Final Project

- CapCut: 8 clips order mein, title card ("Golu & Chiku — Episode 1"), library se halka kids music dialogue ke neeche, check karke 1080p export.
- Thumbnail: chat G.P.T ka prompt + 3 references (dono sheets + episode ka ek frame) → "Laddoo kahan gaya?"
- Title, description, 10 tags — bina clickbait, bina jhoothe claims.
- Upload settings: Audience → "Yes, it's made for kids"; pehle Unlisted rakh ke check, phir Public.
- Series plan: agle 10 episodes (title, story, moral) same characters aur locations mein + har hafte ek episode ka schedule. Tip: publish se pehle 2 episodes ready rakho.

### Aaj ka kaam

Final project: apna pehla complete episode banao aur upload karo.

# Master Style line (is course wali)

```
Style: Soft, colourful, high-quality 3D animated kids' cartoon, rounded character shapes, smooth clay-like textures, warm gentle lighting, expressive oversized eyes, friendly Indian children's animation aesthetic, clean polished rendering, consistent character proportions.
```

# Settings cheat-sheet

| Kaam | Tool / Mode | Settings |
|---|---|---|
| Characters, kahani, prompts | chat G.P.T | Ek hi chat — sab yaad rehta hai |
| Character / location sheet | Flow · Image · Nano Banana Pro | 16:9, Master Style line |
| Start frame | Flow · Image · Nano Banana Pro | Sheet + location reference, 16:9 |
| Scene video | Flow · Video · Frames | Start frame, 16:9, 8 sec, 720p |
| Video bina start frame (test) | Flow · Video · Ingredients | Sheets reference mein, 16:9, 8 sec |
| Continuity | Flow · video ka last frame | Save frame → agle scene ka start frame |
| Edit | CapCut | Order, title card, music, captions, 1080p export |

Note: tools ke menu, model naam aur options update hote rehte hain — screen pe jo naam dikhe wahi use karo.
