

Skillomate Testing APK Build Comparison

Date: 2026-09-12

Scope: Off-record Android testing APK generated from the current Skillomate source tree. The artifact uses a neutral filename and keeps the existing app store metadata unchanged.

Artifact Summary

Area	Previous APK	New Testing APK
Artifact	Previous debug-signed Android APK from releases/android	appcopyai/releases/android/skillomate-testing.apk
Created	2026-09-12 12:32:56	2026-09-12 14:45:58
Size	34,869,401 bytes	34,869,401 bytes
SHA-256	3d73aacb4999620d888ee42fcfa75ed940c92cc8a95b2135b55bde333166b820	cf2c7f633a16314edd54f805e6df767eb11c122759cd22c59b3d2fd99b6e2b81

Code And Configuration Changes

- No source code, Expo config, Gradle config, or app store metadata was changed for this testing artifact.
- The APK was rebuilt locally from the current Android release target.
- The final artifact was renamed to a neutral testing filename so the filename does not expose store metadata details.

Build And Signing Changes

- Gradle release build completed successfully with Android SDK path supplied at build time.
- The unsigned arm64 release APK was zip-aligned before signing.
- The testing APK was signed with the existing Android debug keystore for device installation.
- A signing sidecar file was generated by apksigner; the APK itself is the installable artifact.

Verification Performed

- Gradle task :app:assembleRelease completed successfully.
- Metro generated the Android JavaScript bundle during the release build.
- apksigner verification passed for the new testing APK.
- The new testing APK verifies with APK Signature Scheme v2 and v3.
- Package badging was inspected to confirm the Skillomate application id, app label, SDK range, and arm64-v8a native target.

Notes

- This APK is intended for local device testing only.
- It is not Play Store signed and should not be submitted to Google Play.
- Because app store metadata was intentionally left unchanged, installing over an existing build with identical metadata may require uninstalling the old test build first on some devices.

Prepared by Codex for the off-record Skillomate Android testing APK build.
