

Skillomate 1.0 - Version Code 5

Build comparison and release verification - 24 September 2026

BUILD PASSED

VERSION	VERSION CODE	TARGET SDK	ABI
1.0	5	36	arm64-v8a

Release artifacts

Artifact	Size	SHA-256	Result
Skillomate-1.0-vc5-production.apk	35,390,304 bytes	9e3c784c...78e6b5d	Verified
Skillomate-1.0-vc5-production.aab	42,452,342 bytes	8d7e976d...ccd8f41	Verified

Previous vs new

Dimension	Previous release build	New release build
Android version	1.0 / code 4	1.0 / code 5
Build date	17 Sep 2026	24 Sep 2026
Release contents	Earlier application snapshot	Current repository state with subsequent mobile, backend, admin, payment, course and offer-flow changes
Signing identity	Android Debug certificate	Same Android Debug certificate
Distribution readiness	AAB built; release APK unsigned	APK aligned/signed and AAB signed; certificate caveat remains

Release caution

Both artifacts are signed with the same self-signed Android Debug certificate used by the prior production files. This preserves local upgrade compatibility, but it is not a proper private Play upload/release key. Confirm the Play Console upload certificate before submission.

iOS status

Latest local archive and exported IPA: Skillomate 1.0 build 12, created 14 Sep 2026, bundle identifier com.alihussainkhan.edunexfinal. Current project configuration remains at build 12. No new iOS archive or TestFlight build was created in this Android build request.

What changed after version code 4

Repository comparison uses the last commit before the previous code-4 build (1b10c0b, 17 Sep 2026) through the current source. Scope: 401 files, 35,957 insertions and 5,614 deletions across the mobile app, backend and web/admin application.

Mobile experience • Updated mobile navigation, offer media and lesson UI. • Added swipe navigation and iOS-oriented interaction optimizations. • Improved AI chat workflow, course copy, video loading and course layouts. • Improved horizontally scrollable lectures and course-player behavior. Commerce and access • Improved offer signup and payment recovery paths. • Refined Razorpay plan selection, contact prefill and cancellation behavior. • Added purchase-history access and strengthened subscription/course gates.	Backend and reliability • Improved production API routing, CORS configuration and environment loading. • Added shared cache, cron locking, connection-pool readiness and operational controls. • Improved lesson-note persistence, protected content responses and payment auditing. Admin, content and web • Added certificate-template editing and reporting improvements. • Added offer routes, video controls, Meta Pixel settings and responsive refinements. • Expanded regression coverage for auth, checkout, player, access and admin workflows.
--	---

Build and verification performed

Check	Evidence
Gradle release	assembleRelease and bundleRelease completed successfully.
Metadata	APK manifest and AAB embedded config both report version 1.0, version code 5, package com.skillomate.app.
Integrity	APK zip alignment passed; APK signature schemes v2 and v3 verified; AAB JAR signature verified.
Runtime	Signed APK installed on Pixel 10 Pro emulator, launched MainActivity and rendered the login screen without a fatal error.
Configuration	Release bundle contains the production API host api.skillomate.in; min SDK 24 and target SDK 36.
