Lesson 02 — Page Planning

Learning objective

Turn verified business details into an offer, page outline and final headline.

Concepts and explanations

• Collect business name, products or services, city, target customers and desired action.

• Ask for one offer, three customer problems, a page-section order and five headline options.

• The example selected headline is “Birthday Ho Ya Anniversary, Cake Ho Aapki Pasand Ka!”

Step-by-step lesson workflow

• Enter Sweet Crumbs sample details into the Lesson 02 planning prompt.

• Review five headline options and select one.

• Save the offer, customer problems and section sequence.

How to check your work

Compare the result against the original business brief and confirm that no new product claims, pricing, contact details, testimonials or guarantees were introduced.

For the Sweet Crumbs demonstration, verify the specific file names, page goal and section structure before moving to the next lesson.

If an AI response is incomplete, request the missing portion and recheck the combined result instead of assuming it is ready to publish.

Practical assignment

Prepare a business brief and choose a final headline.

Common mistake and integrity rule

A vague request like “make a landing page” lacks the information needed for accurate copy.

Review checklist

☐ I understand the key concepts. ☐ I completed the activity. ☐ I verified names, facts, files and links.

Based on the supplied Course Notes, Chatbot Knowledge Base and All Prompts. English explanatory notes, not a video transcript.
