Lesson 10 — Handle Client Objections

Learning objective

Explain the value of a WhatsApp landing page and negotiate professionally.

Concepts and explanations

• The sample client asks why a page is needed alongside Instagram.

• Example packages are Starter ₹2,999 (one page) and Business ₹5,999 (one page, two revisions, WhatsApp setup).

• A sample payment structure is 50% advance and 50% after going live.

Step-by-step lesson workflow

• Practice a friendly response explaining the complementary roles of Instagram and the page.

• Answer a ₹1,500 counteroffer without automatically lowering price.

• Track agreed scope and payments.

How to check your work

Compare the result against the original business brief and confirm that no new product claims, pricing, contact details, testimonials or guarantees were introduced.

For the Sweet Crumbs demonstration, verify the specific file names, page goal and section structure before moving to the next lesson.

If an AI response is incomplete, request the missing portion and recheck the combined result instead of assuming it is ready to publish.

Practical assignment

Draft the two client replies and payment terms.

Common mistake and integrity rule

Course example prices are not universal; never promise results.

Review checklist

☐ I understand the key concepts. ☐ I completed the activity. ☐ I verified names, facts, files and links.

Based on the supplied Course Notes, Chatbot Knowledge Base and All Prompts. English explanatory notes, not a video transcript.
