Lesson 11 — Course Recap

Learning objective

Complete the workflow and prepare a client-ready demonstration.

Concepts and explanations

• The sequence is Plan → Copy → Images → Code → Mobile Check → Publish → Portfolio → Clients → Deal.

• Accurate filenames, links, business details and honest claims matter throughout.

Step-by-step lesson workflow

• Audit the page brief, copy, images, CTA, mobile layout and live link.

• Verify the portfolio accurately describes the project.

• Prepare a short client handoff and outreach message.

How to check your work

Compare the result against the original business brief and confirm that no new product claims, pricing, contact details, testimonials or guarantees were introduced.

For the Sweet Crumbs demonstration, verify the specific file names, page goal and section structure before moving to the next lesson.

If an AI response is incomplete, request the missing portion and recheck the combined result instead of assuming it is ready to publish.

Practical assignment

Finish a published page, portfolio link and handoff checklist.

Common mistake and integrity rule

No guaranteed clients, orders or income.

Review checklist

☐ I understand the key concepts. ☐ I completed the activity. ☐ I verified names, facts, files and links.

Based on the supplied Course Notes, Chatbot Knowledge Base and All Prompts. English explanatory notes, not a video transcript.
