

AI Influencer Course — Master Script

Female presenter (Neha) · **35 lessons** · Har lesson ~3-4 min · Lessons 1-15 DONE

Female voice (dungi/sikhaungi), naam Neha, photo/video = **Google Flow** (ChatGPT sirf dialogue). 42→35 lessons, har lesson condensed ~3 min, koi Part 1/2 nahi. Cut: L23. Core (Module 5/6/7) untouched.

MODULE 1 — Foundation

LESSON 1 — Introduction DONE

Ye ladki dekh rahe ho?" (screen pe AI influencer ki photo dikhao) "Ye real nahi hai." (2 second pause — viewer ko sochne do) "Ye AI se bani hai. Aur ye mahine ke lakhon kama rahi hai." "Kaise? Wahi main aapko sikhaungi."

2. STORY — Relatable Problem "Dekho, aaj content ka zamana hai. Sabko pata hai." "Lekin problem kya hai?" "Camera ke saamne aane mein sharam aati hai. Time nahi hai. Face nahi dikhana." "Toh log soch lete hain — 'ye mere se nahi hoga.'" (yahan tone thodi soft karo, phir energy wapas badhao) "Ab imagine karo... aapke paas ek aisi model ho jo aapke liye kaam kare. Din raat. Free mein." "Na uski salary. Na uska nakhra. Na photoshoot ka kharcha." "Bas aap phone pe type karo — aur wo ready." 3. KYA KAR SAKTI HAI — Sirf 3 Baatein "Ye AI influencer teen kaam karti hai —" PEHLA — Content "Daily reels, photos, videos. Aaj Dubai mein, kal Goa mein. Aapka Instagram khud grow hoga." DOOSRA — Aapka Business "Aapki dukaan hai? Brand hai? Online store?" "Ye aapke product ke saath photo degi. Professional photoshoot jaisa — jo pehle 50 hazaar mein hota tha." "Aur ye aapke brand ka face ban jaayegi. Log usko dekh ke aapko yaad karenge." TEESRA — Paisa "Followers badhe, toh brands khud aayenge. Sponsorship, ads, product selling — sab isi se hoga." (har point pe screen pe example visual dikhao — reel, product shoot, payment screenshot) 4. SIMPLE PROMISE "Aur sabse badi baat —" "Na coding chahiye. Na editing aani chahiye. Na English." "Sirf ek phone chahiye." "Main aapko step by step sab sikhaungi. Bilkul zero se." 5. CALL TO ACTION "Toh taiyaar ho?" "Lesson 1 mein hum apni AI ladki ka face banayenge — jo har photo mein same dikhegi." "Chalo, shuru karte hain." BOLNE KE TIPS

- Ek line = ek saans. Har full stop pe chhota pause lo.
- "Ye real nahi hai" ke baad 2 second ruko — ye sabse powerful moment hai.
- Aise bolo jaise dost ko chai pe samjha rahe ho — padhne wali tone bilkul nahi.
- Teen kaam wale section mein ungliyon pe gino — 1, 2, 3 — camera pe haath di

LESSON 2 — TOOLS SETUP DONE

Aaj hum apne saare tools set karenge. Video ke end tak aapke phone mein sab accounts ready honge. Next video me seedha kaam shuru hoga. Ek baat pehle clear kar du. Log sochte hain — is kaam ke liye mehenga computer aur mehenge software chahiye. Galat. Humein sirf 3 tools chahiye. teeno aapke phone pe chal jaate hain. Aur shuruat free mein ho jaati hai. Aur yahi 3 tools aage aapki kamai ke auzaar hain. Inhi se product shoots banenge. Inhi se brands ke liye videos banengi. Jo log ye kaam clients ke liye karte hain — wo ek video ke 5 se 20 hazaar lete hain. Toh in dono ko dhyan se set karo. Pehla tool — Google Flow , Google Flow ki madat se hum photo and video generate kar sakte jo photo ko animate karne dusra tool — VN. Ye editing app hai. Reels final karna, captions lagana, music dalna — sab VN mein hoga. Teesra tool — chatgpt jis ki help lekar hum script and dialogues use karenge Photo , video and editing. 3 tools, 3 kaam ise simple system ho hi nahi sakta.

Chalo screen pe aa jao mere saath.

(screen recording start)

Pehle Flow. Browser mein chatgpt.com kholo, ya Play Store se Flow app download karo. Sign up dabao. Google se sign in kar lo — wahi account jo phone mein already hai. Alag password ka jhanjhat nahi. Andar aate hi ye message box dikhega. Yahi se hum photos banayenge. Abhi kuch likhna nahi — bas account ready hona chahiye. Pehla tool set. Ab Google Flow. Browser mein labs.google/flow kholo. Yahan bhi same Google account se sign in karo. Jo account Flow mein use kiya — wahi yahan bhi. Sign in ke baad ye screen aayegi — New Project ka option dikhega. Iska matlab account chalu hai. Abhi project nahi banana. Doosra tool set. Aur last — VN. Play Store ya App Store mein VN Video Editor search karo. Download karo, kholo, ho gaya. Isme sign in ki bhi zaroorat nahi shuruat mein. Teesra set. Total 10 minute ka kaam tha. (face pe wapas)

Ab ek honest baat. Free version ki limit hoti hai. Flow free mein din ki kuch hi photos banti hain. Flow ke free credits bhi limited hain — khatam ho gaye toh agle din tak wait. Ye normal hai. Practice ke liye free kaafi hai. Jab pehla client aayega, tab apni kamai se paid plan lena. Paisa pehle, kharcha baad mein. Ek common galti bhi sun lo. Log Flow alag email se banate hain, Flow alag se. Phir bhool jaate hain kaunsa account kahan hai. Kaam aadhe mein atak jaata hai. Fix simple hai — dono ek hi Google account se banao. Ek email, poora system ek jagah.

Aaj ka kaam simple hai — teeno tools set karo. Flow aur Flow ek hi Google account se, VN download karke. 10-15 minute lagenge. Aur teeno ko phone ki home screen pe ek saath rakho. Ek folder banao — naam do 'AI Studio'. Roz dikhega toh roz kaam hoga.

Agle lesson mein hum prompt likhna seekhenge — wo formula jisse Flow se exactly wahi photo banti hai jo aap chahte ho.

Milte hain agle lesson mein.

LESSON 3 — AI Influencer Ka DONE

Aaj hum apna AI influencer character banayenge. Iska face, naam, aur personality — sab aaj final hoga. Ek baat shuru mein hi bata du. Is video ka sabse important concept hai consistency. Matlab — character ka face har photo mein same dikhna chahiye. Agar aaj kuch aur dikha, kal kuch aur, toh audience trust nahi karegi.

Aur brands toh bilkul kaam nahi dengi. Toh pura focus isi pe rahega. Sabse pehle character decide karte hain. Ye step log usually skip kar dete hain, aur baad mein problem hoti hai. Maan lo hum ek fashion creator bana rahe hain. Naam — Neha. Age — 22. City — Mumbai. Interest — fashion aur travel. Bas. Ye 4 cheezein kahin likh lo. Notes app mein, kaagaz pe, kahin bhi. Ab jab bhi AI se kuch generate karayenge, ye details har baar use hongi. Isse character consistent rahega. Aur ek baat samajh lo — ye character sirf Instagram photos ke liye nahi ban raha. Isi character se hum aage product shoots karenge. Ads banayenge. Brands ke liye UGC videos banayenge. Poora earning system isi character pe khada hoga. Toh isko seriously banao. Ye aapka asset hai. Chalo ab face banate hain. Screen pe aa jao mere saath.

(screen recording start) Tool kholo. Aur ye prompt likho: 'A 22 year old Indian woman, oval face, brown eyes, long black hair, natural makeup, soft smile, realistic photo' Ek cheez notice karo — maine face ki har detail likhi hai. Aankhon ka color. Baalon ki length. Skin tone. Smile. Jitni detail doge, utna control milega. Vague prompt doge toh har baar alag result aayega. Generate karo. (result aane pe) Theek hai. Ye humari Neha hai. Agar pehli baar mein result pasand na aaye — normal hai. Prompt mein detail change karo, dobara generate karo. 2-3 try mein sahi face mil jaata hai. Ab jo photo final pasand aayi — usko save karo. Iska naam rakho reference photo. Ye photo aage har kaam mein lagegi. Jab bhi nayi photo banani ho — ye reference upload karoge, aur bologe: same face, different pose. Dekho demo — (demo: same face — beach pe, cafe mein, ethnic wear mein) Teen photos. Teen jagah. Teen outfits. Face same. Isi wajah se Neha ek real insaan lagti hai.

Aaj ka kaam simple hai. Apna character banao — naam, age, city, interest. Phir face generate karo aur reference photo save karo. 10-15 minute ka kaam hai. Aaj hi kar lo, kyunki agle lesson mein isi photo se kaam shuru hoga.

Agle lesson mein hum is character ki alag alag photos banayenge — poses, outfits, locations — aur uski pehli Instagram post taiyaar karenge.

Milte hain wahan." Kya badla, short mein: Section labels hata diye — ab ye ek continuous baat hai jo record karte time naturally flow karegi. Dramatic lines ("magic time", "secret", "reveal") gayab. "Earning connection" wala 15-second block add kiya — "product shoots, ads, UGC, earning system" — jo course ke promise se jodta hai. Aur ek practical line add ki jo real instructor bolta hai: "pehli baar mein result pasand na aaye toh normal hai" — ye line trust banati hai kyunki fake gurus kabhi failure mention nahi karte. Ab Script Bible wali baat — ye suggestion sach mein sabse valuable hai. Agar 50+ lessons banane hain toh pehle ek 1-page document bana lete hain: tumhari speaking style, sentence length, Hinglish ratio, kab screen pe ho kab sirf recording, catchphrases jo tum naturally bolte ho. Uske baad har lesson ka script main usi voice mein dungi — consistent, tumhari awaaz jaisa. Banau Script Bible? Uske liye bas ye batao — tum normally kaise bolte ho video mein: zyada Hindi ya zyada English? Koi tumhara existing video/reel ka style hai jo reference ban sake?

LESSON 4 — Prompt Likhna Seekho DONE

Aaj hum prompt likhna seekhenge. Video ke end tak aapke paas ek ready formula hoga — jisse Flow se exactly wahi photo banegi jo aap chahte ho. Ye lesson chhota hai, lekin pure course ka sabse important skill yahi hai. Kyun? Kyunki AI ka pura game prompt pe chalta hai. Achha prompt — achhi photo. Kharab prompt — kharab photo. Simple. Aur aage jab aap clients ke liye product shoots karoge — wahan bhi yahi formula lagega. Jo banda achha prompt likhna jaanta hai, wo hi 5 se 20 hazaar wale projects deliver kar paata hai. Baaki log try karte reh jaate hain. Toh aaj ka formula dhyan se samjho. Prompt ke 5 hisse hote hain. Bas 5.

Pehla — kaun. Matlab character kaun hai. age, gender, nationality.

Doosra — face details. Aankhein, baal, skin, smile.

Teesra — kapde. Kya pehna hai.

Chautha — jagah. Kahan khadi hai. Background kya hai.

Paanchwa — style. Photo kaisi lagni chahiye — realistic, professional, casual. Ab dono ka farak dekho.

Chalo screen pe aa jao mere saath.

(screen recording start — Flow khula hai)

Pehle kharab prompt likhta hu: 'ek sundar ladki ki photo banao' Generate karo... Dekho result. Har baar alag ladki aayegi. Kuch bhi control nahi. Ab formula wala prompt: 'A 22 year old Indian woman, oval face, brown eyes, long black hair, wearing a yellow kurti, standing in a cafe, natural lighting, realistic photo' (prompt screen pe bada dikhao) Generate karo... Ab dekho farak. Wahi mila jo maanga tha. Paanchon hisse gino is prompt mein — kaun, face, kapde, jagah, style. Sab hai. Ek aur kaam ki baat. Prompt English mein hi likhna. AI English samajhta hai sabse achha. English weak hai? Koi baat nahi — Flow se hi bolo: 'is Hindi line ko English prompt banao.' Wo khud bana dega. AI se hi AI ka kaam lo. Ab ek common galti. Log prompt mein 'beautiful', 'gorgeous', 'stunning' jaise words bhar dete hain. Inse kuch nahi hota. AI ko 'beautiful' ka matlab nahi pata — usko details chahiye. 'Beautiful' hatao, 'oval face, brown eyes' likho. Detail hi beauty hai.

Aaj ka kaam simple hai — apne character ke liye 5 prompts likho, paanchon hisse daal ke. Har prompt mein sirf jagah aur kapde badlo. Phir teeno generate karke dekho. 15 minute ka kaam hai. Ye 5 prompts sambhal ke rakhna — agle lesson mein inhi se hum same face wali alag alag photos banayenge. Wahi asli consistency ka kaam shuru hoga.

Milte hain agle lesson mein.

LESSON 5 — Same Face, Alag Pose DONE

Aaj se asli kaam shuru. Aaj hum apne character ki alag alag photos banayenge — lekin face bilkul same rahega. Ye wahi skill hai jo maine Lesson 2 mein promise ki thi. Aur yahi skill aapko baaki logon se alag karti hai. Kyunki photo toh koi bhi bana leta hai. Lekin ek hi character ki 50 photos — alag pose, alag jagah, same face — ye bahut kam log kar paate hain.

Aur brands isi cheez ke paise dete hain. Unko ek model chahiye jo unke product ke saath baar baar dikhe. Har baar naya chehra unka brand kharab karta hai. Toh aaj ka method dhyan se dekho. Sabse pehle apni reference photo nikalo — wahi jo Lesson 2 mein save ki thi. Ye photo aaj se aapka sabse keemti file hai.

Chalo screen pe aa jao mere saath.

(screen recording start — Flow khula hai) Pehla step — Flow mein plus ka button dabao aur apni reference photo upload karo. Doosra step — photo ke saath ye prompt likho: 'Use this exact face. Same woman, same facial features. Now she is sitting in a coffee shop, wearing a white shirt, holding a coffee cup, smiling, realistic photo' (prompt screen pe bada dikhao) Dhyan do pehli line pe — 'Use this exact face. Same woman, same facial features.' Yahi line asli jaadu ka kaam karti hai. Ye AI ko bolti hai — naya chehra mat banao, yahi wala rakho. Generate karo. (result aane pe 1-2 second pause) Dekho — cafe mein baithi hai, kapde alag, pose alag. Lekin face? Wahi Neha. Ab isi ko repeat karo. Same reference photo, bas prompt ka aakhri hissa badlo: '...standing on a beach at sunset, wearing a blue dress' Generate. '...walking on a Mumbai street, wearing jeans and white top' Generate. (teeno results side by side dikhao) Teen photos. Teen jagah. Ek face. Yahi hai consistency.

Ab ek honest baat. Har baar 100% perfect nahi aayega. Kabhi face 90% match hoga, 10% alag lagega. Ye AI ki limit hai — normal hai. Iska fix — jo photo sabse zyada match ho, wahi use karo. Baaki delete. 4 generate karo, best 1 rakho. Quality hamesha quantity se badi hai. Ek common galti bhi sun lo. Log nayi photo banate hain, phir usko reference bana lete hain. Phir us se agli. Aisa karne se face dheere dheere badalta jaata hai — 10 photos baad bilkul alag ladki ban jaati hai. Rule pakka kar lo — reference photo hamesha wahi original Lesson 2 wali. Har nayi photo usi se banegi. Copy ki copy kabhi nahi.

Aaj ka kaam simple hai — apni reference photo se 5 alag photos banao. Alag jagah, alag kapde, alag pose. Jo sabse achhi match ho, wo 5 save karo. 20-25 minute lagenge. Ye 5 photos aapke Instagram ki pehli khop banengi.

Agle lesson mein hum outfits pe focus karenge — casual, ethnic, western, party wear — pura wardrobe banayenge apne character ka.

Milte hain agle lesson mein.

MODULE 2 — Photo Skills

LESSON 6 — Outfits Badalna DONE

Aaj hum apne character ka pura wardrobe banayenge. Video ke end tak aapke paas 4 alag style ki photos hongi — casual, ethnic, western, aur party wear. Ab aap sochoge — kapde badalna toh pichle lesson mein seekh liya. Aaj naya kya hai? Naya ye hai — aaj hum soch samajh ke wardrobe banayenge, random nahi. Kyunki Instagram pe har outfit ka apna kaam hota hai. Aur fashion brands ke liye toh ye direct kamai hai. Kurti bechne wala brand chahta hai ki model kurti mein dikhe. Jeans wala brand jeans mein. Jo creator har style carry kar sakta hai — usko har type ka brand kaam deta hai. Matlab zyada styles, zyada clients.

Toh chalo 4 style ka system samjho.

Pehla — Casual. Jeans, t-shirt, simple look. Ye daily content ke liye hai. Sabse zyada yahi use hoga.

Doosra — Ethnic. Kurti, saree, salwar suit. Indian audience isse sabse zyada connect karti hai. Festival season mein toh yahi chalega.

Teesra — Western. Dress, formal shirt, office look. Ye premium feel deta hai.

Chautha — Party wear. Shaadi, function, evening look. Occasion content ke liye.

Chalo screen pe aa jao mere saath.

(screen recording start — Flow khula hai) Reference photo upload karo — wahi original wali. Aur prompt ka pattern same rahega, bas outfit wala hissa badlega. Casual ke liye: 'Use this exact face. Same woman, same facial features. Now she is wearing blue jeans and a white t-shirt, casual look, standing near a window, natural light, realistic photo' Generate. Ethnic ke liye bas outfit badlo: '...wearing a red and gold kurti with jhumka earrings, festive look...' Generate. (dono results dikhao) Ek cheez notice karo — maine sirf kapde nahi likhe, accessories bhi likhi. Jhumka, earrings, watch — ye chhoti details photo ko real banati hain. Western: '...wearing a black formal dress, office look, standing in a modern office...' Aur party wear: '...wearing a heavy embroidered lehenga, wedding guest look, evening lighting...' (chaaro photos ek saath dikhao) Dekho — chaar style, chaar mood. Aur chaaro mein face same. Ab aapka character kisi bhi type ka content bana sakta hai. Ek kaam ki baat. Outfit ke saath lighting bhi match karo. Party wear ke saath 'evening lighting'. Casual ke saath 'natural light'. Office ke saath 'indoor lighting'. Galat lighting photo ko nakli bana deti hai.

Ab common galti. Log ek hi photo mein bahut kuch maang lete hain — 'red kurti, green dupatta, gold jhumka, silver watch, pink lipstick...' Itna sab likhoge toh AI confuse ho jaata hai aur result kharab aata hai.

Rule — outfit ki 2-3 cheezein bas. Main kapda, ek accessory, aur lighting. Khatam.

Aaj ka kaam simple hai — apne character ki 4 photos banao, chaaro style mein. Casual, ethnic, western, party. 20 minute ka kaam hai. Ab aapke paas total 9-10 photos ho gayi hongi. Content bank ban raha hai.

Agle lesson mein hum locations badalenge — beach, cafe, street, ghar — apne character ko puri duniya ghumayenge, ghar baithe.

Milte hain agle lesson mein.

LESSON 7 — Locations Badalna DONE

Aaj hum apne character ko duniya ghumayenge. Ghar baithe. Video ke end tak wo Goa ke beach pe bhi hogi, Mumbai ki street pe bhi, aur ek mehenge cafe mein bhi. Real influencers ko yahi karne ke liye lakhs kharch karne padte hain. Flight, hotel, photographer — ek Goa trip ka content 50-60 hazaar mein padta hai. Aapka kharcha — zero. Aur yahi cheez brands ko bhi chahiye. Travel brands, cafe, hotels, resorts — sab chahte hain unki jagah pe model dikhe. Jab aap bologe 'main aapki location pe shoot kara sakta hu bina aaye' — unke liye ye sasta aur fast hai. Aapke liye ye paisa hai.

Toh chalo, locations ka system samjho. Instagram ke liye 5 type ki locations sabse zyada kaam aati hain. Pehli — Ghar. Bedroom, balcony, kitchen. Ye relatable content hai — log connect karte hain. Doosri — Cafe. Coffee shop ka aesthetic look. Reels ke liye perfect. Teesri — Street. City ki road, market, colorful walls. Fashion content yahan chalta hai. Chauthi — Nature. Beach, pahad, garden. Travel content ka base. Paanchwi — Premium. Hotel lobby, rooftop, pool side. Ye luxury feel deta hai — brands ko yahi chahiye.

Chalo screen pe aa jao mere saath.

(screen recording start — Flow khula hai) Reference photo upload karo. Pattern wahi — bas location wala hissa badlega. Beach ke liye: 'Use this exact face. Same woman, same facial features. Now she is standing on a beach in Goa, wearing a flowy summer dress, sunset in the background, wind in hair, realistic photo' Generate. (result pe 1-2 second pause) Dekho — sunset, beach, hawa mein baal. Aisa lag raha hai sach mein Goa gayi hai. Ek cheez notice karo prompt mein — 'sunset in the background, wind in hair.' Maine sirf jagah nahi likhi, mahaul likha. Yahi photo ko zinda banata hai. Ab street: '...walking on a busy Mumbai street, colorful shops in background, candid walking pose...' Aur cafe: '...sitting in an aesthetic cafe, holding a coffee cup, plants and warm lights in background...' (teeno results dikhao) Teen shehar, teen mood — aur kharcha zero. Ek pro tip. Location ke saath pose bhi badlo. Beach pe 'walking' ya 'looking at the sea'. Cafe mein 'sitting, holding cup'. Street pe 'candid walking'. Har jagah khadi hokar camera dekhna — nakli lagta hai. Real influencers candid photos daalte hain.

Ab common galti. Log famous jagah maang lete hain — 'Taj Mahal ke saamne', 'Eiffel Tower ke neeche'. Problem ye hai ki AI famous jagahon ko aksar galat banata hai — Taj Mahal ka shape bigad jaata hai, aur photo turant fake pakdi jaati hai.

Rule — famous monument ki jagah general location likho. 'Historic Indian architecture in background' — ye safe hai aur real lagta hai.

Aaj ka kaam simple hai — apne character ki 5 photos banao, paanchon location type mein. Ghar, cafe, street, nature, premium. 25 minute ka kaam hai. Ab aapke paas 15 ke aas paas photos ho gayi hongi — alag outfits, alag locations, same face. Instagram shuru karne ka saaman taiyaar ho raha hai.

Agle lesson mein hum photo ki quality pe kaam karenge — plastic wali AI look kaise hataye aur photos ko bilkul real kaise banaye.

Milte hain agle lesson mein.

LESSON 8 — Realistic Skin aur DONE

Aaj hum sabse badi problem fix karenge — plastic wali AI look. Video ke end tak aapki photos aisi lagengi jaise kisi ne camera se kheenchi hon.

Pehle problem samjho. AI photos aksar zyada perfect hoti hain. Skin bilkul chikni, ek bhi daag nahi, baal ek ek jagah set. Aur yahi problem hai — insaan aise nahi dikhte. Log photo dekh ke 2 second mein pakad lete hain — 'ye AI hai.' Aur jaise hi pakda gaya, trust khatam. Followers nahi badhenge.

Aur brands ke liye toh ye seedha rejection hai — koi brand nakli dikhne wali photo pe paise nahi lagata. Real dikhna hi is business ki asli currency hai. Toh aaj ka formula — perfection hatao, reality daalo. Iske liye prompt mein 4 cheezein add karni hain. Pehli — skin texture. 'Natural skin texture, visible pores' — matlab skin pe halki asli bandagi dikhe. Doosri — imperfections. 'Slight imperfections, few flyaway hairs' — thode bikhre baal, halka sa asli-pan. Teesri — camera details. 'Shot on iPhone' ya 'shot on DSLR, 50mm lens' — AI ko camera ka naam do, wo photo waisa hi banata hai. Chauthi — natural lighting. 'Soft natural light' — studio wali flat lighting nakli lagti hai.

Chalo screen pe aa jao mere saath.

(screen recording start — Flow khula hai)

Pehle bina in details ke ek photo banati hu — jaise ab tak banate the. (generate karo, result dikhao) Achhi hai, lekin dekho — skin plastic jaisi chamak rahi hai. Ye AI look hai. Ab wahi prompt, 4 nayi cheezon ke saath: 'Use this exact face. Same woman, same facial features. Sitting in a cafe, wearing a white shirt. Natural skin texture, visible pores, slight imperfections, few flyaway hairs, shot on iPhone, soft natural light, realistic candid photo' (prompt screen pe bada dikhao) Generate karo. (dono photos side by side dikhao) Farak dekho. Pehli wali — magazine ka poster. Doosri wali — kisi dost ne photo kheenchi ho jaisi. Aur Instagram pe doosri wali hi chalti hai. Ek aur kaam ka word — 'candid'. Iska matlab bina pose kiye, natural moment. 'Candid photo' likhne se pose bhi natural aata hai aur photo aur real lagti hai.

Ab ek honest baat. Kabhi kabhi in sab ke baad bhi haath ya ungliyan ajeeb aayengi — 6 ungliyan, mude hue haath. Ye AI ki sabse purani kamzori hai. Aisa aaye toh photo dobara generate karo, ya aisi pose maango jisme haath kam dikhe — 'hands in pockets' ya 'holding a bag'.

Ab common galti. Log realistic banane ke chakkar mein prompt mein 'ultra realistic, hyper realistic, 8K, ultra HD' bhar dete hain. Ulta asar hota hai — photo aur zyada AI jaisi lagti hai. Ye words hatao. 'Realistic candid photo, shot on iPhone' — bas itna kaafi hai.

Aaj ka kaam simple hai — apni purani 3 photos utho, aur wahi prompts in 4 nayi details ke saath dobara generate karo. Pehli aur nayi photo compare karo. Farak khud dikh jayega. 15-20 minute ka kaam. Aaj ke baad aapki har photo mein ye 4 cheezein hamesha rahengi. Ye aapka permanent formula hai.

Agle lesson mein hum photo quality ke baaki problems fix karenge — blur, kharab background, ajeeb aankhein — pura repair system.

Milte hain agle lesson mein.

LESSON 9 — Photo Quality Fix DONE

Aaj hum photo repair karna seekhenge. Kharab haath, ajeeb aankhein, bigda background — sab theek karna. Video ke end tak aapke paas ek complete checklist hogi — kaunsi photo rakhni hai, kaunsi phenkni hai, aur kaunsi repair karni hai. Ye lesson kyun zaroori hai? Kyunki ek kharab photo aapka pura account duba sakti hai. Log 50 achhi photos bhool jaate hain, lekin ek 6-ungli wali photo ka screenshot le ke mazak bana dete hain.

Aur brands ke saath toh sochna bhi mat — client ko delivery se pehle har photo perfect chahiye. Quality check hi wo cheez hai jo shaukeen aur professional mein farak karti hai. Professional ko hi paise milte hain. Toh pehle checklist samjho. Har photo save karne se pehle 4 cheezein dekho. Pehli — haath aur ungliyan. Gino. Paanch hain? Shape sahi hai? Doosri — aankhein. Dono ek jagah dekh rahi hain? Ek jaisi hain? Teesri — background. Peeche ki cheezein sahi hain? Bigde hue words ya toote objects toh nahi? Chauthi — face match. Reference se milao — yahi Neha hai na? Chaaro pass? Photo save. Koi ek fail? Ab repair seekhte hain.

Chalo screen pe aa jao mere saath.

(screen recording start — Flow khula hai) Ye dekho — ek photo jisme sab achha hai, lekin haath ajeeb aaya hai. Pehla tareeka — targeted fix. Photo Flow mein daalo aur likho: 'Fix only the hands in this image. Keep the face, outfit, pose and background exactly the same.' (prompt screen pe dikhao) Generate karo. (result dikhao) Dekho — haath theek, baaki sab same. Yahi line har problem pe kaam karti hai — 'fix only the eyes', 'fix only the background'. Bas 'only' zaroor likhna, warna AI puri photo badal dega. Doosra tareeka — crop. Agar problem photo ke kinare pe hai — jaise background mein koi bigda object — toh repair ki zaroorat hi nahi. Crop karo, problem gayab. Sabse fast fix yahi hai. Teesra tareeka — pose se bachao. Agar haath baar baar kharab aa rahe hain, toh aisi pose maango jisme haath dikhe hi nahi — 'hands in pockets', 'hands behind back', 'holding a bag'. Problem ko fix karne se behtar hai problem aane hi na do.

Ab ek honest baat. Kuch photos repair ke baad bhi theek nahi hoti. 2 baar fix karne pe bhi kharab hai? Delete karo, nayi banao. Ek photo pe 20 minute lagana bewakoofi hai jab nayi 2 minute mein ban jaati hai. Photo se pyaar mat karo — quality se karo.

Ab common galti. Log repair pe repair karte jaate hain — pehle haath fix, phir aankh fix, phir background fix. Har fix ke saath face thoda badalta jaata hai. Teen fix ke baad Neha koi aur ban chuki hoti hai.

Rule — ek photo pe maximum ek fix. Do problems hain? Delete, nayi banao.

Aaj ka kaam simple hai — apni ab tak ki saari photos kholo aur chaaro checklist points pe check karo. Jo fail ho — ek fix try karo ya delete karke nayi banao. 20 minute ka kaam hai. Aaj ke baad aapki gallery mein sirf perfect photos rahengi. Yahi professional standard hai.

Agle lesson mein hum ek hi baithak mein 30 photos ka content bank banayenge — pura mahina ka content, ek din mein.

Milte hain agle lesson mein.

LESSON 10 — 30 Photos ka Content DONE

Aaj Module 2 ka last lesson hai. Aur aaj hum wo karenge jo real content creators karte hain — ek baithak mein pura mahine ka content taiyaar. 30 photos. Ek din mein. Ye hai aaj ka target.

Pehle samjho ye kyun zaroori hai. Instagram ka sabse bada rule hai — regular posting. Roz ya har doosre din post hona chahiye. Ab agar aap roz photo banane baithoge, toh 10 din mein thak jaoge aur account band. Isi liye 90% log fail hote hain.

Solution — batch banana. Ek din mehnat, pura mahina aaram. Professional creators yahi karte hain. Aur jab clients ke liye kaam karoge, tab bhi yahi system chalega. Client bolega — '30 product photos chahiye is mahine.' Jo banda system se kaam karta hai, wo ek din mein deliver kar deta hai. Jo bina system ke karta hai, wo mahina laga deta hai. Fast delivery hi zyada clients laati hai.

Toh chalo system samjho. 30 photos ka formula simple hai — 5 outfits, 6 locations. Paanch guna chhe — tees. Ho gaya hisaab. Lekin ek-ek karke 30 prompts likhne mein pura din jayega. Isliye ek smart trick — prompts bhi Flow se hi likhwao.

Chalo screen pe aa jao mere saath.

(screen recording start — Flow khula hai) Naya chat kholo aur ye likho: 'I have an AI influencer character — a 22 year old Indian woman, fashion and travel creator. Write 30 photo prompts for her Instagram. Use 5 outfits: casual jeans, ethnic kurti, western dress, saree, party wear. Use 6 locations: home, cafe, street, beach, garden, hotel rooftop. Each prompt must include: natural skin texture, slight imperfections, shot on iPhone, soft natural light, realistic candid photo. Vary the poses — sitting, walking, candid moments. Number them 1 to 30.' (prompt screen pe dikhao) Generate karo... Dekho — 30 ready prompts, numbered, sab details ke saath. Jo formula humne 8 lessons mein seekha — skin texture, lighting, candid — sab har prompt mein already daala hua hai. Ye list copy karo aur notes mein save kar lo. Ye aapki content factory hai. Ab production shuru. Reference photo upload karo, aur list se prompt number 1 chipkao. Generate. Number 2. Generate. Bas yahi repeat. Har photo pe Lesson 9 wali checklist lagao — haath, aankhein, background, face match. Pass hui toh save, fail hui toh skip karke aage badho. Ruko mat.

Ab ek honest baat. 30 mein se saari perfect nahi aayengi. 30 generate karoge toh 20-22 achhi milengi. Ye normal hai — isi liye 30 banate hain, taaki 20 pakki mil jayein. Free version ki limit bhi aa sakti hai — toh ye kaam 2-3 din mein baant lo. Roz 10-10 photos. Koi jaldi nahi.

Rule — har 5 photos mein kam se kam ek candid ho. Kahin has rahi hai, kahin coffee pi rahi hai, kahin peeche mud ke dekh rahi hai. Variety hi real bana ti hai.

Aaj ka kaam simple hai — pehle 30 prompts ki list banwao Flow se. Phir aaj kam se kam 10 photos generate karke save karo. Baaki 20 agle 2 din mein. Checklist har photo pe lagana. Jab 20+ photos ka bank ban jaye — samajh lo Module 2 complete. Aapke paas ab wo cheez hai jo 99% logon ke paas nahi — ek consistent character aur ek mahine ka content.

Agle lesson se Module 3 shuru — ab hum photos se aage badhenge. Aapki Neha ab chalegi, bolegi, aur reels banayegi. Google Flow ki entry hoti hai wahan se.

Milte hain agle lesson mein.

MODULE 3 — Video & Reels

LESSON 11 — Photo se Video Banana DONE

Aaj se Module 3 shuru. Aur aaj wo hoga jiska intezaar tha — aapki Neha zinda hogi. Photo se video banegi. Wo palkein jhapkeyegi, muskurayegi, baal hawa mein udenge. Aaj se hum apna doosra tool use karenge — Google Flow.

Pehle samjho video kyun itni badi baat hai. Instagram ab reels ka game hai. Photo pe 100 log aate hain, toh reel pe 1000. Algorithm reels ko hi aage badhata hai. Bina video ke growth aadhi reh jaati hai.

Aur paise ki baat karein — brands photo se zyada video ke paise dete hain. Ek product photo ke jahan 500-1000 milte hain, wahan ek chhoti video ke 2000-5000. Video banane wala creator hamesha zyada kamata hai. Simple.

Toh chalo, pehli video banate hain. Ek baat pehle — video banane ka formula photo se alag hai. Photo mein hum likhte the wo kaisi dikhe. Video mein likhna hai wo kya kare. Movement. Harkat. Yahi farak hai.

Chalo screen pe aa jao mere saath.

(screen recording start) Browser mein labs.google/flow kholo. Sign in toh Lesson 3 mein ho hi gaya tha. New Project dabao. Ab dekho — yahan prompt box hai, aur uske paas image upload ka option. Yahi hamara main kaam hai. Pehla step — apni ek best photo upload karo. Main Neha ki cafe wali photo daal rahi hu. Ye photo video ka pehla frame banegi — matlab video isi photo se shuru hogi. Doosra step — prompt likho. Yaad rakho — ab movement likhni hai: 'She smiles softly, blinks naturally, slowly lifts the coffee cup and takes a sip, gentle camera movement, natural motion' (prompt screen pe bada dikhao) Dekho kya likha — smile, blink, cup uthana. Chhoti chhoti harkatein. Aur 'natural motion' — taaki robot jaisi na lage. Generate dabao. Video banne mein 1-2 minute lagte hain. Photo se zyada time lagta hai — normal hai. (result aane pe 1-2 second pause) Aur ye dekho... Neha zinda ho gayi. Palkein jhapak rahi hai, muskura rahi hai, coffee pi rahi hai. Yahi photo thi ab tak — ab ye insaan lag rahi hai. Ye video 8 second ke aas paas hogi. Aur reels ke liye itna kaafi hai — Instagram pe sabse zyada chalne wali reels 7-15 second ki hi hoti hain. Ab ek zaroori rule — movement chhoti rakho. 'She smiles and blinks' — perfect. 'She dances and jumps and turns around' — disaster. AI badi harkat mein face bigaad deta hai. Chhoti harkat, real result.

Ab ek honest baat. Flow ke free credits limited hain — din ke kuch hi videos banengi. Aur har video perfect nahi aayegi — kabhi haath ajeeb hilega, kabhi face thoda badlega. 2-3 baar generate karna padega best ke liye. Photo wala hi rule — best rakho, baaki delete.

Ab common galti. Log pehli hi video mein bolti hui Neha maangte hain — 'she says hello everyone'. Abhi nahi. Bolna alag skill hai — lip-sync — wo agla lesson hai. Aaj sirf movement. Ek step ek baar.

Aaj ka kaam simple hai — apni 3 best photos utho aur teeno se video banao. Chhoti movements — smile, blink, baal, chai. Jo sabse achhi lage wo save karo. 20-25 minute ka kaam, credits ke hisaab se. Aaj aapne wo kar liya jo Instagram pe 99% log nahi kar paate — apna AI video content.

Agle lesson mein Neha bolegi — lip-sync seekhenge, jisme wo aapke likhe words apne muh se kahegi.

Milte hain agle lesson mein.

LESSON 12 — Lip-Sync Video DONE

Aaj Neha bolegi. Apne muh se, aapke likhe words. Video ke end tak aapke paas ek video hogi jisme aapka character camera dekh ke baat kar raha hoga. Ye skill kitni badi hai, pehle wo samjho. Bolti hui AI influencer — yahi toh asli influencer hai. Sirf photos wala account model portfolio lagta hai. Bolne wala account insaan lagta hai. Log usse connect karte hain, comments karte hain, follow karte hain.

Aur kamai ki nazar se — bolne wali video hi UGC ads ka base hai. Brands jo 5 se 20 hazaar per video dete hain, wo isi type ki video ke liye — jisme model unka product haath mein leke uske baare mein bolti hai. Aaj wali skill seedha us paise se judti hai. Module 6 mein isi se deals karenge.

Toh chalo shuru karte hain. Lip-sync ka system 2 step ka hai.

Pehle — script, matlab jo Neha bolegi.

Doosra — Flow mein wo bulwana. Pehla step yahi kar lete hain. Neha ki pehli line kya ho? Simple si intro line: 'Hi guys! Main Neha. Mumbai se. Fashion aur travel meri zindagi hai. Naye ho toh follow karlo!' Chhoti line rakhna — 8-10 second mein bol paye utni. Lambi speech pehli baar mein mat lo.

Chalo screen pe aa jao mere saath.

(screen recording start — Google Flow khula hai) Flow mein new project kholo. Apni Neha ki ek achhi photo upload karo — aisi jisme wo camera ki taraf dekh rahi ho. Side wali photo mat lena — bolne wali video mein face saamne chahiye. Ab prompt mein movement ke saath bolna bhi likho: 'She looks at the camera and speaks naturally, friendly expression, saying: Hi guys! Main Neha. Mumbai se. Fashion aur travel meri zindagi hai. Naye ho toh follow karlo!' (prompt screen pe bada dikhao) Dekho structure — pehle expression aur movement, phir 'saying:' ke baad exact words jo bolne hain. Generate karo. Bolne wali video mein thoda zyada time lagta hai. (result aane pe 1-2 second pause) Aur ye raha... Neha bol rahi hai. Hoth words ke saath chal rahe hain, expression natural hai. Ye moment yaad rakhna — aapka character ab creator ban gaya. Ab ek zaroori tip — Hinglish ke liye. AI kabhi kabhi Hindi words ka uchcharan ajeeb karta hai. Agar 'zindagi' ya koi word galat bole, toh us word ki spelling prompt mein aise likho jaise bola jaata hai — 'zindagee'. Sound ke hisaab se spelling — ye trick 90% pronunciation problems fix kar deti hai.

Ab ek honest baat. Lip-sync AI ka sabse mushkil kaam hai. Kabhi hoth aage-peeche challenge, kabhi awaaz robotic lagegi. Pehli baar mein perfect nahi aayega — 3-4 try normal hai. Aur free credits ki limit yahan jaldi aati hai kyunki bolne wali videos zyada credit khaati hain. Isliye aaj sirf ek video pe focus karo — lekin achhi wali.

Ab common galti. Log pehli hi video mein lambi speech likh dete hain — 30-40 second ka bhashan. Jitne zyada words, utni zyada galti ki jagah. Hoth kahin match karenge, kahin nahi.

Rule — ek video, ek baat. 8-10 second, 15-20 words. Lambi baat bolni hai? 2-3 chhoti videos banao, VN mein jod lenge — editing wale lesson mein yahi seekhenge.

Aaj ka kaam simple hai — Neha ki intro line likho, 15-20 words mein. Phir Flow mein lip-sync video banao. 3-4 try karo, best save karo. 25-30 minute ka kaam. Ye video sambhal ke rakhna — aage Instagram ki pehli reel banegi isi se.

Agle lesson mein hum awaaz pe kaam karenge — AI voice banana, taaki Neha ki awaaz har video mein same rahe, bilkul uske face ki tarah.

Milte hain agle lesson mein.

LESSON 13 — AI Voice Banana DONE

Aaj hum Neha ki awaaz final karenge. Video ke end tak uski ek fixed awaaz hogi — jo har video mein same rahegi, bilkul uske face ki tarah.

Pehle samjho ye kyun zaroori hai. Yaad hai Lesson 2 mein consistency ka rule? Face har photo mein same — wahi rule awaaz pe bhi lagta hai. Aaj Neha moti awaaz mein boli, kal patli — audience turant pakad legi ki kuch gadbad hai. Trust gaya.

Aur brands ke liye toh awaaz bhi brand hoti hai. Jab aap client ke liye 10 UGC videos banaoge, toh dason mein same awaaz chahiye. Jo creator consistent voice deliver karta hai, wohi repeat kaam paata hai. Repeat client matlab har mahine ki pakki kamai.

Toh chalo Neha ki awaaz banate hain. Awaaz ke 3 hisse hote hain — inhe samajh lo, kaam aasan ho jayega.

Pehla — pitch. Awaaz patli hai ya bhaari.

Doosra — speed. Tez bolti hai ya aaram se.

Teesra — tone. Energetic hai, calm hai, ya friendly. In teeno ko milakar character ki voice personality banti hai. Neha 22 saal ki hai, friendly hai — toh uski awaaz hogi: soft pitch, medium speed, warm friendly tone.

Chalo screen pe aa jao mere saath.

(screen recording start — Google Flow khula hai) Flow mein lip-sync video banate time hum prompt mein awaaz ki details bhi likh sakte hain. Pichle lesson wala prompt yaad karo — ab usme voice add karenge: 'She looks at the camera and speaks naturally, friendly expression, soft warm female voice, young Indian accent, medium pace, saying: Hi guys! Main Neha. Mumbai se.' (prompt screen pe bada dikhao) Dekho kya naya juda — 'soft warm female voice, young Indian accent, medium pace.' Yahi teen cheezein har video mein same likhni hain. Generate karo. (result aane pe pause) Suno awaaz... Soft hai, friendly hai, Indian accent hai. Ye Neha ki awaaz hai. Ab sabse important kaam. Ye voice description kahin likh lo — wahi notes mein jahan character sheet hai. Aaj se ye line har bolne wali video ke prompt mein jayegi, bilkul waise jaise reference photo har baar upload hoti hai. Face ke liye reference photo. Awaaz ke liye reference line. Dono mila ke pura consistent character.

Ab ek honest baat. AI voice mein halka farak har video mein aayega — 100% same awaaz abhi AI ki limit se bahar hai. Lekin jab tak pitch, accent aur tone same hai, audience ko farak nahi padta. Log exact awaaz nahi, awaaz ka feel yaad rakhte hain.

Ab common galti. Log fancy words likh dete hain — 'melodious voice, sweet honey voice, angelic tone'. AI in words se confuse hota hai aur har baar alag result deta hai.

Rule — simple aur napi-tuli details: pitch (soft/deep), accent (Indian/neutral), pace (slow/medium/fast). Bas. Jitna simple likhoge, utna same milega.

Aaj ka kaam simple hai — Neha ki voice description final karo — pitch, accent, pace. Notes mein save karo character sheet ke saath. Phir ek nayi lip-sync video banao us voice line ke saath. 15-20 minute ka kaam. Ab aapka character complete hai — face bhi fixed, awaaz bhi fixed.

Agle lesson mein hum VN kholenge — pehli baar. Videos ko jodna, captions lagana, music dalna — reel ko final professional look dena.

Milte hain agle lesson mein.

LESSON 14 — Reel Editing Basics DONE

Aaj hum teesra tool kholenge — VN. Aur aaj aapki pehli puri reel banegi. Video ke end tak aapke paas Instagram pe daalne layak final reel hogi — captions aur music ke saath.

Pehle samjho editing itni zaroori kyun hai. Flow se jo video aati hai, wo raw maal hai. Achhi hai, lekin adhuri. Instagram pe jo reels chalti hain unme captions hote hain, music hota hai, sahi size hota hai. Editing hi raw video ko reel banati hai.

Aur kamai ki baat — brands finished video ke paise dete hain, raw clips ke nahi. Ek raw clip ki koi keemat nahi. Wahi clip captions aur music ke saath 5000 ki UGC video ban jaati hai. Matlab editing wo skill hai jo aapke kaam ki keemat 10 guna badha deti hai.

Toh chalo, VN kholte hain. Dar mat lena — VN mein hum sirf 4 kaam seekhenge. Bas 4. Utne mein 90% reels ban jaati hain.

Chalo screen pe aa jao mere saath.

(screen recording start — phone screen, VN app) VN kholo. Neeche plus ka button — dabao. New Project. Ab gallery khulegi — apni Flow wali videos select karo. Main Neha ki 2 clips le rahi hu — ek smile wali, ek bolne wali. Order mein select karo — jo pehle dikhani hai wo pehle. Done dabao. Pehla kaam — size theek karna. Reels ka size hota hai 9:16 — lambai wala, phone jaisa. Neeche 'Ratio' ka option hai — dabao, 9:16 chuno. Ho gaya. Ab ye Instagram ke liye perfect frame hai. Doosra kaam — clips jodna aur kaatna. Dono clips timeline pe neeche dikh rahi hain — ye already judi hui hain. Kisi clip ka koi hissa hatana ho — clip pe tap karo, kinare se ghasito. Shuru ka aadha second hamesha kaato — video turant action se shuru honi chahiye, khali frame se nahi. Pehla second hi decide karta hai log rukenge ya scroll karenge. Teesra kaam — captions. Neeche 'Text' dabao. Jo Neha bol rahi hai wahi type karo — 'Hi guys! Main Neha.' Text ko neeche-beech mein rakho, size bada, white color black outline ke saath — har background pe dikhega. Instagram pe 80% log bina awaaz ke reels dekhte hain. Captions nahi, toh wo 80% audience gayi. Chautha kaam — music. Neeche 'Music' dabao. VN ki library se koi soft beat chuno. Ab sabse zaroori setting — music ka volume 20-30% pe rakho. Neha ki awaaz hero hai, music sirf background. Volume ka option music clip pe tap karne se milta hai. Bas. Chaar kaam ho gaye. Ab export — upar right corner mein tick ya export ka button. Quality 1080p chuno, export dabao. Video gallery mein save ho jayegi.

(final reel dikhao) Dekho — captions ke saath, music ke saath, sahi size mein. Ye ab raw clip nahi, ye reel hai. Instagram-ready.

Ab ek honest baat. Pehli editing mein time lagega — 30-40 minute bhi lag sakte hain. Normal hai. Teesri-chauthi reel tak yahi kaam 10 minute mein hoga. Editing haath ki aadat hai, dimag ki nahi.

Ab common galti. Log VN mein effects ka khazana dekh ke pagal ho jaate hain — transitions, filters, stickers, animations sab thok dete hain. Reel circus ban jaati hai aur asli cheez — Neha — kahin kho jaati hai.

Rule — pehli 10 reels mein sirf ye 4 cheezein: cut, ratio, caption, music. Koi effect nahi, koi transition nahi. Simple hi professional hai.

Aaj ka kaam simple hai — apni Flow wali videos VN mein daalo aur pehli reel banao. Chaaro steps — ratio, cut, caption, music. Export karke phone mein save karo. 30-40 minute ka kaam, pehli baar hai isliye. Ye reel sambhal ke rakhna — Module 4 mein yahi aapke Instagram ki pehli post banegi.

Agle lesson mein main aapko 5 reel formats dunga — jo Instagram pe sabse zyada chalte hain. Uske baad content ideas ki kami kabhi nahi hogi.

Milte hain agle lesson mein.

LESSON 15 — 5 Reel Formats Jo **DONE**

Aaj Module 3 ka last lesson hai. Aur aaj main aapko wo 5 reel formats dunga jo Instagram pe sabse zyada chalte hain. Video ke end tak aapke paas content ka aisa system hoga ki 'aaj kya banau' wala sawal kabhi nahi aayega.

Pehle problem samjho. Skill toh aa gayi — photo, video, lip-sync, editing sab seekh liya. Lekin ab sabse bada sawal — banau kya? 90% creators yahin fail hote hain. Skill hai, ideas nahi. Do hafte content daala, phir dimag khali, phir account band.

Solution — formats. Format matlab bana-banaya saancha. Ek baar saancha samajh lo, phir usme naya maal daalte jao. Ideas kabhi khatam nahi honge.

Aur brands bhi format ki bhasha bolte hain. Client bolega — 'ek GRWM chahiye' ya 'unboxing style video banao.' Jo creator formats jaanta hai, wo client ki baat turant samajh jaata hai. Yahi professional hone ki nishani hai.

Toh chalo — 5 formats, ek ek karke.

Pehla — GRWM. Matlab Get Ready With Me. Neha taiyaar ho rahi hai — pehle simple look, phir ready hoke final look. Ye Instagram ka sabse popular fashion format hai. Banane ke liye — 2 photos chahiye: ek casual, ek ready. Flow se dono ki chhoti videos, VN mein jodo, beech mein transition. Ho gaya GRWM.

Doosra — Day in Life. Neha ka pura din — subah coffee, phir kaam, shaam ko walk, raat ko book. 4-5 chhoti clips, har clip 2-3 second, music ke saath judi hui. Ye format relatable hai — log Neha ko insaan ki tarah dekhne lagte hain.

Teesra — Tips. Neha camera pe bol ke 3 tips deti hai — '3 fashion tips jo har ladki ko pata honi chahiye.' Lip-sync video + captions. Ye format followers ko value deta hai, aur value dene wale accounts hi tezi se badhte hain.

Chautha — Trends. Instagram pe jo audio ya style trending hai, wahi Neha ke saath banao. Trending audio wali reels ko algorithm khud aage badhata hai — ye free ki reach hai. Trend kaise pata chale? Instagram scroll karo — jo audio baar baar sunai de, wahi trend hai.

Paanchwa — Product. Neha kisi product ke saath — haath mein pakde dikhaana, use karna, uske baare mein bolna. Abhi practice ke liye koi bhi cheez lo — chai ka cup, sunglasses. Aage yahi format brands ke liye banaoge — paise leke. Ye 5 mein se sabse keemti format hai.

Chalo screen pe aa jao mere saath.

(screen recording start) Ek format live banate hain — Day in Life, sabse aasan wala. Flow mein Neha ki 4 photos banao — subah coffee ke saath, laptop pe kaam, shaam ki walk, raat ko book. Prompts wahi purane formula se. Ab Flow mein chaaron ki chhoti videos — har ek mein halki movement. 'She sips coffee slowly'... 'She types and smiles'... aise. Ab VN mein chaaron jodo. Har clip 2-3 second ki kaato. Ek soft music. Caption — 'A day in my life.' Export.

(final reel dikhao) Dekho — 15 second ki reel, Neha ka pura din. Ye format har hafte repeat kar sakte ho — bas activities badlo.

Ab ek honest baat. Har format har baar viral nahi hoga. Kuch reels 200 views pe rukengi, koi achanak 20,000 le aayegi. Ye Instagram ka nature hai — pehle se koi nahi bata sakta. Isliye formats rotate karo aur patience rakho. 20-30 reels ke baad pattern dikhna shuru hota hai — kaunsa format aapki audience ko pasand hai.

Ab common galti. Log ek format pakad lete hain — sirf GRWM, sirf tips. Audience bore ho jaati hai, algorithm bhi. Same cheez baar baar dekhna kisi ko pasand nahi.

Rule — hafte mein 3 reels, teen alag formats. Rotation hi account ko fresh rakhta hai.

Aaj ka kaam simple hai — paanchon formats mein se koi 2 chuno aur dono ki ek-ek reel banao. Aaj ek, kal ek — koi jaldi nahi. Har reel pe Lesson 14 wale 4 editing steps lagana.

Aur ye samajh lo — Module 3 complete. Aapke paas ab character hai, photos hain, videos hain, reels hain, aur formats ka system hai. Content ki factory puri taiyaar.

Agle lesson se Module 4 shuru — Instagram. Ab ye sab duniya ko dikhayenge. Account setup se leke 1000 followers tak ka pura plan.

Milte hain agle lesson mein.

MODULE 4 — Instagram

LESSON 16 — Profile Setup (professional) SCRIPT · ~3min

Aaj se Module 4 shuru. Ab tak jo banaya wo factory thi — aaj se dukaan kholenge. Aaj Neha ki professional profile banegi. Video ke end tak account live hoga, ready to post.

Pehle samjho profile itni badi baat kyun hai. Jab koi aapki reel dekhta hai, wo turant profile pe aata hai — aur 3 second mein decide karta hai follow kare ya nahi. Aur brands to deal se pehle profile 10 baar dekhte hain. Kharab bio, adhura profile — deal wahin khatam. Profile aapki dukaan ka board hai.

4 cheezein set karni hain. Pehla — username. Chhota, yaad rehne wala, character ke naam se juda — jaise neha.mumbai. Numbers aur underscores mat daalo, spam jaisa lagta hai. Naam liya hua ho to ek word jodo — style, diaries.

Doosra — profile photo. Neha ki sabse achhi close-up photo, jisme face saaf dikhe. Full body mat lena — profile chhoti dikhti hai, door se sirf face pehchana jaata hai.

Teesra — bio, 3 lines. Pehli: wo kaun hai — Fashion and Travel Creator. Doosri: kahan se — Mumbai. Teesri: personality ya hook. Ek-do emoji bas. Bio mein AI likhna optional hai — kuch log likhte hain, curiosity mein log follow karte hain. Par kisi ke puchne pe jhooth mat bolna — curiosity theek hai, dhokha nahi.

Chautha — account type. Settings mein Professional Account, phir Creator. Free hai, aur analytics deta hai — kaunsi reel kitne logon ne dekhi, followers kab active hain. Bina data ke growth andhere mein teer hai.

Aur ek chhoti baat — jab post karna shuru karo, pehli posts random mat daalna. Thoda soch ke daalna taaki profile khulte hi saaf aur professional lage, bikhra hua nahi.

Ab common galti. Log account banate hi 10 photos ek saath thok dete hain, excitement mein. Naye account se app spam ka shak karta hai, aur reach pehle din se dab jaati hai. Rule — aaj sirf setup aur zyada se zyada ek pehli post. Baaki posting schedule se jayega, agla lesson.

Aaj ka kaam — profile taiyaar karo: username, close-up profile photo, 3-line bio, Creator account on. Phir ek achhi pehli post daal do. 20 minute ka kaam.

Agle lesson mein posting schedule aur captions-hashtags ka system banayenge — taaki roz kya aur kab post karna hai, sochna na pade. Milte hain agle lesson mein.

LESSON 17 — Posting Schedule + Captions & Hashtags SCRIPT · ~3min

Aaj hum posting ka pura system banayenge — kab post karna, kitna, kaunse time pe, aur har post ke saath jaane wale do zaroori cheezein: caption aur hashtags. Video ke end tak aapke paas ek fixed weekly schedule hoga jise bas follow karna hai.

Pehle samjho schedule itna zaroori kyun hai. App ka algorithm sabse zyada ek cheez dekhta hai — regularity. Roz aane wala account uski nazar mein serious hai. Kabhi 5 posts phir 10 din gayab — aisa account timepass hai, aur timepass ko reach nahi milti.

Toh schedule simple rakho. Hafte mein 3 reels — Lesson 15 wale formats se, teen alag. Rotation account ko fresh rakhta hai. Timing — jab aapke followers active hon, wahi Creator analytics batata hai. Aam taur pe subah 8-10 ya shaam 7-10 achha chalta hai. Ek fixed din-time chuno, jaise Mon-Wed-Fri shaam 8 baje, aur usi pe tik jao.

Ab caption aur hashtags — chhoti cheezein, par reach mein bada farak. Dono ka kaam alag hai. Hashtag app ko batata hai ye post kis baare mein hai, kisko dikhani chahiye. Caption dekhne wale ko rokta hai — ruko, padho, comment karo. Ek machine ke liye, ek insaan ke liye. Dono chahiye.

Caption formula. Pehli line hook honi chahiye — sabse zaroori, kyunki wahi 'more' se pehle dikhti hai. Ek sawal ya bold baat. Phir 1-2 line value ya story. Aur end pe ek call to action — comment karo, save karo, follow karo. Long paragraph mat likho, log padhte nahi.

Hashtags. Galat soch — 30 bade hashtags daal do. Ismein aapki chhoti post kho jaati hai. Sahi tareeka — mix. Kuch bade (lakhon posts wale), kuch medium, aur kuch chhote niche wale jahan aap actually dikh sakte ho. 10-15 relevant hashtags kaafi hain, 30 bekaar bhare hue nahi. Har baar ek jaisa set copy-paste mat karo — app ko spam lagta hai, 2-3 sets banao aur rotate karo.

Ab common galti. Log caption ko baad ki soch samajhte hain — video pe mehnat, caption mein 'nice day' likh dete hain. Adha kaam wahin barbaad. Caption post ka salesman hai.

Aaj ka kaam — apna weekly schedule likho: kaunse din, kaunsa time, kaunse formats. Phir 3 caption templates aur 3 hashtag sets bana ke notes mein save karo. Ek baar bana lo, phir har post pe bas bharna hai.

Agle lesson mein algorithm ke andar ghusenge — samjhenge kaunsi reel rukti hai aur kaunsi udti hai. Milte hain agle lesson mein.

LESSON 18 — Reels Algorithm Samjho SCRIPT • ~3min

Aaj hum app ke dimag ke andar ghusenge — algorithm. Wahi cheez jo decide karti hai kaunsi reel 200 views pe rukegi aur kaunsi 2 lakh tak jayegi. Video ke end tak aap samajh jaoge ye machine kaam kaise karti hai, aur ise khush kaise rakhna hai.

Pehle ek galat soch todo. Log samajhte hain algorithm dushman hai jo reach dabata hai. Galat. Algorithm ek dukaandaar hai — uska ek hi kaam hai, log app pe zyada der rukein. Jo reel logon ko rokti hai, algorithm use aur logon tak le jaata hai. Aap aur algorithm dushman nahi, partner ho — dono ko ek hi cheez chahiye, log rukein.

Ab machine kaise sochti hai, step by step. Aap reel daalte ho. App use pehle chhote group ko dikhata hai — jaise 200 logon ko. Ab wo dekhta hai in 200 ne kya kiya. Agar zyada logon ne poori dekhi, dubara dekhi, like-share-save kiya — app samajhta hai ye achhi hai, aur agle 2000 ko dikhata hai. Agar logon ne pehle second mein scroll kar diya — app samajhta hai bekaar hai, aur rok deta hai. Har level pe yahi test.

Toh algorithm 3 cheezein sabse zyada dekhta hai. Ek — watch time, kitni der dekhi. Isi liye pehla second sabse zaroori hai, aur video chhoti-tight honi chahiye. Do — completion aur re-watch, poori dekhi ya loop hui. Isi liye reel ka end shuru se jude to loop banta hai. Teen — shares aur saves, kyunki jo cheez log doston ko bhejte hain ya save karte hain wahi algorithm ke liye sona hai. Likes se zyada saves aur shares matter karte hain.

Ek aur cheez — pehle 1 ghante ka engagement. Post karte hi agar log jaldi react karte hain, algorithm ko signal milta hai ye hot hai. Isi liye active time pe post karna zaroori hai, aur pehle ghante mein comments ka reply dena.

Ab common galti. Log har baar naya kuch try karte hain — ek reel chali to bhi format badal dete hain. Algorithm confuse ho jaata hai ki account kis baare mein hai. Rule — jo chala, uska pattern samjho aur repeat karo. Consistency algorithm ko clear signal deti hai.

Aaj ka kaam — apni pichhli reels analytics mein kholo. Dekho sabse zyada kaunsi dekhi gayi, aur uske pehle 2 second mein kya tha. Wahi cheez agli reel mein repeat karo. 15 minute — aaj se data aapka teacher hai.

Agle lesson mein in sab ko jodenge — 0 se 1000 followers ka pura roadmap. Milte hain agle lesson mein.

LESSON 19 — 0 se 1000 Followers + Engagement SCRIPT · ~3min

Aaj main aapko 0 se 1000 followers ka pura roadmap dunga, aur unhe rokne-jodne ka engagement system bhi. Video ke end tak aapko exactly pata hoga agle 2 mahine kya karna hai.

Pehle samjho 1000 ka number khaas kyun hai. Do wajah. Ek — 1000 pe app aapko serious lena shuru karta hai, reach khulti hai. Do, aur ye badi hai — 1000 se brands ki duniya khulti hai. Aapko lagega 1000 kuch nahi, brands to lakhon wale dhundhte hain. Galat. Nano-influencers — 1000 se 10000 wale — brands ke sabse pasandeeda hain, kyunki engagement sabse zyada aur rate sasta.

Roadmap. Bhool jao ki 1000 ek pahaad hai — ise hafton mein todo. Har hafte 3 reels, teen alag formats. Do mahine mein 24 reels. Ismein se 2-3 chalengi, aur wahi 1000 tak le aayengi. Bas 3 cheezein consistent rakho — regularity, formats rotation, aur pehle ghante ka engagement. Shuru ke followers aapke apne circle se aayenge — koi sharam nahi, wahi base hai.

Ab asli khel — followers laane ke baad unhe rokna aur jodna. Isi ko engagement kehte hain, aur ye followers se zyada keemti hai brands ke liye. Engagement matlab log sirf aate nahi, kuch karte hain — like, comment, reply, share. App ki nazar mein engaged account hi zinda account hai.

Roz ka 20-minute routine. Ek — apni har post ke comments ka reply do, khaas kar pehle ghante mein. Reply se comment badhta hai, comment se reach. Do — apni story mein roz kuch daalo — poll, sawal, behind the scenes. Stories followers ko roz aapse jodti hain aur bina reach khoye active rakhti hain. Teen — apne niche ke doosre creators aur followers ke posts pe genuine comment karo, roz 10-15. Isse naye log aap tak aate hain. Ye peecha karo, spam nahi — asli baat.

Ab common galti. Log post karke gayab ho jaate hain — daala aur bhool gaye. Instagram do-tarfa hai. Jo sirf post karta hai, community nahi banti; jo reply karta, comment karta, judta hai — wahi badhta hai.

Aaj ka kaam — do cheezein. Ek, apna 8-hafte ka reel plan kaagaz pe likho: har hafte 3 reels, teen formats. Do, aaj ka 20-minute engagement routine abhi karo — apne comments ke reply, ek story, aur 10 doosron ke posts pe comment.

Agle lesson se Module 5 shuru — Product Photography. Ab wo skill jiske log seedha paise dete hain. Milte hain agle lesson mein.

MODULE 5 — Product Photography

LESSON 20 — Product Photo Basics SCRIPT • ~3min

Aaj se Module 5 shuru, aur aaj se course ka rang badal jaata hai — kyunki aaj se wo seekhenge jiske log seedha paise dete hain. Product photography. Video ke end tak aapke paas pehli product photo hogi — Neha ke haath mein ek asli product.

Pehle market samjho. Har online seller ko product photos chahiye — Amazon wala, Flipkart wala, Instagram pe kapde bechne wali didi, Shopify store wala. Sabko. Aur traditional shoot ka kharcha suno — model ka charge, photographer, studio, ek din. Hazaaron रुपये ek shoot ke. Aap wahi kaam Flow se ghar baithe, ek din mein kai baar kar sakte ho — isi liye ye seedhi kamai hai.

Ab basic samjho. Product photo ka ek hi kaam hai — product ko saaf, achha, bharse layak dikhana. Do type hote hain: clean shot, jahan product plain background pe alag dikhe; aur lifestyle shot, jahan product zindagi mein istemaal hota dikhe. Aaj clean shot, jo base hai.

Kaise banate hain. Aapke paas do cheezein hain — Neha, aur product ki photo jo client bhejta hai. Flow mein dono ko jodna hai: Neha product ko haath mein pakde, ya use karti dikhe. Prompt mein teen cheezein clear rakho — product bilkul waisa jaisa client ki photo mein hai, Neha ka wahi consistent face, aur ek saaf simple background jahan product ubhre. Magic line yaad rakho — same face — taaki har product photo mein Neha ek jaisi rahe.

Ek zaroori baat — product ki shape, colour, aur label bilkul same rehna chahiye. Client ka product agar red bottle hai to red hi rahe, aur uspe likha naam badle nahi. Ismein AI galti karta hai — isi liye result ko dhyaan se check karo, aur galat aaye to prompt mein product ki detail aur pakki karo.

Ab common galti. Log product ko chhota, kone mein, ya andhere mein dikha dete hain — nazar Neha pe chali jaati hai, product pe nahi. Yaad rakho — yahan hero product hai, Neha nahi. Product frame mein bada, saamne, achhi roshni mein hona chahiye.

Aaj ka kaam — koi bhi ek product lo, kisi cheez ki saaf photo — chai ka cup, bottle, ya cream ka jar. Flow mein Neha ke saath uski ek clean product photo banao. Product hero rakho, face same rakho, background simple. 20 minute ka kaam.

Agle lesson mein isko professional studio level pe le jayenge — lighting, background, angles ka system. Milte hain agle lesson mein.

LESSON 21 — Professional Studio Shots SCRIPT · ~3min

Aaj hum product photos ko professional studio level pe le jayenge. Lighting, background, aur angles — teeno ka system. Video ke end tak aap wahi photos bana paoge jo bade brands apne catalogs mein use karte hain.

Pehle samjho studio shot ka matlab kya hai. Kal wali clean shot achhi thi, par studio shot usse ek level upar hai. Farak details mein hai: sahi lighting jo product ko chamkaye, sahi background jo product ko ubhaare, aur sahi angle jo product ki best side dikhaye. Yahi teen cheezein saste aur mehngi look ka farak banati hain.

Pehla — lighting. Product photo mein lighting sabse badi cheez hai. Prompt mein soft studio lighting maango — aisi roshni jo product pe hard shadow na daale, aur uski shape saaf dikhaye. Bottle, jar, ya gadget ho to halki shine achhi lagti hai. Andhera ya flat light product ko sasta dikhata hai.

Doosra — background. Studio shot ke liye plain, clean background — white, grey, ya product ke rang se match karta ek soft shade. Background kabhi product se zyada dhyaan na kheenche. Ek trick — thoda soft shadow product ke neeche rakho, isse product 'rakha hua' dikhta hai, hawa mein tairta nahi.

Teesra — angle. Har product ka ek best angle hota hai. Bottle aur jar aankh ke level pe seedha; jewellery aur watch thoda upar se close; shoes ka side. Ek product ke 2-3 angle banao — front, thoda tilt, aur ek close-up detail. Client ko choice dena professional lagta hai.

Ab prompt mein sab jodo — product exactly same, Neha ka same face agar wo pakde ho, soft studio lighting, clean background, aur angle bataao. Aur wahi rule — product hero, saaf, sharp.

Ab common galti. Log ek hi photo banake bhej dete hain. Client ko lagta hai option nhi hai. Rule — har product ke kam se kam 3 variations do: alag angle, ya sirf product, ya Neha ke saath. Zyada choice, zyada professional.

Aaj ka kaam — kal wale product ko studio level pe le jao. Soft lighting, clean background, aur 3 alag angles banao. Ek set taiyaar karo jaise ek asli catalog ke liye. 20-25 minute.

Agle lesson mein lifestyle shots seekhenge — product ko asli zindagi mein dikhana, aur platform-ready banana. Milte hain agle lesson mein.

LESSON 22 — Lifestyle + Platform-Ready Shots SCRIPT · ~3min

Aaj hum do cheezein seekhenge — lifestyle shots, aur photos ko platform-ready banana. Lifestyle product photography ka sabse mehnga hissa hai, aur platform rules wo cheez hai jo client ko turant impress karti hai. Video ke end tak dono aa jayenge.

Pehle lifestyle samjho. Studio shot product ko dikhata hai — lifestyle shot product ke saath zindagi dikhata hai. Watch white background pe studio hai. Wahi watch Neha ki kalai pe, cafe mein coffee ke saath — lifestyle. Aur log cheez nahi, cheez ke saath ki feeling khareedte hain. Isi liye brands lifestyle ke zyada paise dete hain.

Kaise banate hain. Neha ko product ke saath asli scene mein rakho — skincare bathroom mirror ke saamne, sunglasses cafe ki dhoop mein, kurti street pe. Prompt mein teen cheezein: product bilkul same, Neha ka same face, aur ek asli natural setting jahan product istemaal ho raha lage. Candid feel maango — posed studio nahi. Product phir bhi saaf dikhe, chhupe nahi.

Ab platform-ready. Client ko sirf achhi photo nahi, uske platform ke hisaab se sahi photo chahiye. Har platform ki apni bhasha hai. Amazon aur Flipkart ke main image ka rule — plain pure white background, product frame mein bada, koi text ya extra cheez nahi. Isi liye pehli clean studio wali white background photo yahan kaam aati hai. Instagram aur website ke liye lifestyle aur square ya vertical crop chalta hai. Ek smart creator dono deta hai — Amazon ke liye white, Instagram ke liye lifestyle.

Ek chhoti baat jo bada farak karti hai — size aur crop. Amazon square chahta hai, Instagram feed square ya 4 by 5, reel 9 by 16. Client ko ready size mein dena — usko crop na karna pade — isi se aap yaad reh jaate ho.

Ab common galti. Log ek hi photo har jagah bhej dete hain. Amazon lifestyle reject kar deta hai kyunki background white nahi; Instagram pe plain white boring lagta hai. Rule — pehle poochho photo kahan chahiye, phir us platform ke hisaab se banao.

Aaj ka kaam — apne product ki ek lifestyle photo banao Neha ke saath asli scene mein. Phir usi product ki ek Amazon-ready plain white photo bhi. Do platform, do photo — ek set. 25 minute.

Agle lesson mein fashion try-on seekhenge — kisi bhi kapde ya jewellery ko Neha ko pehnana. Milte hain agle lesson mein.

LESSON 23 — Fashion Try-On SCRIPT · ~3min

Aaj hum fashion try-on seekhenge — kisi bhi kapde, jewellery, ya accessory ko Neha ko pehnana. Video ke end tak aap client ka bheja hua kurti ka flat photo utha ke, wahi kurti Neha ko pehna paoge.

Pehle samjho ye skill itni keemti kyun hai. Online shopping ki sabse badi problem — customer ko pata nahi kapda pehna hua kaisa lagega. Isi liye fashion mein returns sabse zyada. Aur iska ilaaj — model photos. Jo kurti model pe dikhti hai, wo flat photo se 3 guna zyada bikti hai. Har chhoti clothing brand, har boutique wali didi ko ye chahiye, par model ka kharcha uthana mushkil. Aap wahi sasta aur turant de dete ho.

Kaise karte hain. Aapke paas do cheezein — Neha, aur client ka product photo, jaise ek kurti flat rakhi hui. Flow mein try-on ka matlab — wahi kurti Neha ko pehna do. Prompt mein teen cheezein: kapda bilkul same rahe — same colour, same design, same print; Neha ka same face; aur ek natural pose ya simple background. Sabse zaroori — kapde ka design, print aur colour badalna nahi chahiye. Yehin AI galti karta hai — print thoda change kar deta hai. Result dhyaan se check karo, print match karo.

Kya-kya pehna sakte ho — kurti, saree, dress, top; jewellery jaise earrings aur necklace; aur accessories jaise sunglasses, bag, watch. Jewellery aur accessories ke liye close-up angle achha kaam karta hai taaki detail dikhe.

Ek professional touch — ek hi kapde ke 2-3 look do. Ek full body, ek half, ek close-up fabric detail. Client ko poora idea milta hai, aur wo photos seedha uski website pe ja sakti hain.

Ab common galti. Log kapde ka print ya colour badalne dete hain aur bhej dete hain. Client ke liye ye sabse bada dhoka hai — jo dikha wo customer ko milega nahi, returns aur badhenge. Rule — product bilkul same, chahe pose kuch bhi ho.

Aaj ka kaam — kisi kapde ya accessory ki ek flat photo lo — apni ya online se — aur Flow mein Neha ko wahi pehna ke ek try-on photo banao. Print same rakhna. Phir 2 alag look banao. 20-25 minute.

Agle lesson mein pehla client kaise laaye — asli kamai yahan se shuru. Milte hain agle lesson mein.

LESSON 24 — Pehla Client Kaise Laye SCRIPT · ~3min

Aaj ka lesson course ka sabse bada mod hai. Aaj tak aap seekh rahe the — aaj se kamaoge. Pehla client kaise dhundhna, kaise baat karna, aur kaise haan karwana. Video ke end tak aapke paas pura outreach system hoga.

Pehle ek dar todo. Log sochte hain client lana matlab salesman banna, ghar ghar dhakke khana. Galat. Aapke paas wo cheez hai jo hazaaron sellers ko chahiye aur sasti mein mil nahi rahi — professional photos. Aap maang nahi rahe, ek problem ka hal de rahe ho.

Ab client kahan hai. Sabse aasan jagah — Instagram khud. Chhote sellers dhundho: kapde bechne wali boutiques, homemade skincare, jewellery, candles, chhote food brands. Inki profiles dekho — jinki photos kamzor hain, wahi aapke best client hain, kyunki unhe farak turant dikhega. Doosri jagah — local businesses, Facebook marketplace sellers, aur apne aas-paas ke dukaan wale jinki online presence kamzor hai.

Ab baat kaise karni hai. Cold message ka formula — chhota aur unke baare mein. Teen line. Pehli — ek sachhi tareef ya unke product ka zikr. Doosri — ek short line ki aap professional product photos banate ho jo sales badhati hain. Teesri — ek chhoti offer ya sawal, jaise 'ek free sample bana ke dikhau?'. Lamba paragraph aur 'main ye main wo' mat likho — koi nahi padhta.

Sabse taakatwar cheez — free sample. Unhi ke product ki ek photo bina maange bana ke bhej do. Jab wo apni cheez professional dikhti dekhte hain, aadhi haan wahin ho jaati hai. Ek din mein 5-10 sellers ko aise approach karo. Number ka khel hai — 20 messages mein 1-2 haan karte hain, aur wahi shuru ke liye kaafi.

Ab common galti. Log ek-do message bhej ke, jawab na aane pe haar jaate hain. Ya har kisi ko ek jaisa copy-paste bhejte hain. Rule — roz thoda outreach, har message thoda personal, aur follow-up karo. Ek 'na' ka matlab agla client, band darwaaza nahi.

Aaj ka kaam — 10 chhote sellers dhundho jinki photos kamzor hain. Un mein se 2 ke liye ek-ek free sample photo banao, aur teeno line wala message ke saath bhejo. Aaj se roz 5 outreach. 30 minute.

Agle lesson mein pricing — kitne paise maangne hain, rate card ke saath. Milte hain agle lesson mein.

LESSON 25 — Product Shoot ki Pricing SCRIPT · ~3min

Aaj Module 5 ka last lesson — aur sabse zaroori sawal ka jawab: kitne paise maangne hain. Video ke end tak aapke paas ready rate card hoga. Client puchhega 'kitne loge?' aur aap bina atke jawab doge.

Pehle samjho pricing itni badi baat kyun hai. Yahin do galtiyen hoti hain, dono khatarnak. Pehli — zyada maang liya, client bhaag gaya. Doosri, aur ye zyada hoti hai — kam maang liya. Kam maangne se sirf kamai nahi girti, izzat girti hai. Sasta kaam sasta banda dikhata hai, aur client aage bhi kam hi dega.

Ab pricing ka sahi tareeka. Ek photo ke paise mat socho — packages banao. Log ek se dar jaate hain, package mein value dikhti hai. Teen tier rakho. Basic — kuch photos, ek product, ek platform ready. Standard — zyada photos, alag angles, do platform ke sizes. Premium — poora set, lifestyle plus studio, jitne products, sab platform ready. Har upar wale tier mein zyada value, aur zyada daam.

Numbers ke liye guide — shuru mein Indian sellers ke hisaab se: chhota package sau se hazaar ke beech, standard hazaar se teen hazaar, premium teen se saat hazaar ke aas-paas. Ye starting hai — jaise portfolio aur naam banega, daam badhega. Kabhi mehngi shehar ke brand ko chhote daam mat dikhao, aur chhote seller pe premium mat thopo.

Do zaroori rule. Ek — daam mat girao, scope girao. Client kum budget bole to keemat mat todo, package chhota kar do — kam photos, kam angles. Isse aapki value bani rehti hai. Do — advance lo. Aadha kaam se pehle, aadha delivery pe. Bina advance kaam shuru mat karna — ye professional ki nishani hai aur time-waster clients hata deta hai.

Jab client 'kitne loge' puchhe, ghabra ke kuch bhi mat bolo. Confidently package batao, ek line mein value samjhao — 'is package mein aapko ye ye milega' — aur chup ho jao. Jo pehle bolta hai wo kamzor padta hai.

Ab common galti. Client 'thoda kum karo' bole to log turant aadha kar dete hain. Ye sabse badi galti. Thoda adjust theek hai, par apni mehnat muft mat karo. Value pe khade raho.

Aaj ka kaam — apna rate card banao. Teen packages, har ek mein kya milega aur kitne ka. Ek page pe saaf likho, taaki client puchhe to turant bhej sako. 20 minute.

Agle lesson se Module 6 shuru — UGC aur brand deals, video wali asli kamai. Milte hain agle lesson mein.

MODULE 6 — UGC & Brand Deals

LESSON 26 — UGC — Samajh + Pehli Video Banana

SCRIPT • ~3min

Aaj se Module 6 shuru — UGC aur brand deals. Aur aaj do cheezein: pehle samjhenge UGC hai kya aur brands iske itne paise kyun dete hain, phir pehli poori UGC video banayenge. Video ke end tak aapke paas ek ready UGC video hogi — waisi jaise brands ko chahiye.

UGC matlab User Generated Content. Simple bhasha — aisi video jo aam user ne banayi lage, brand ne nahi. Jaise koi ladki apne phone se bole 'yaar maine ye face wash try kiya, kamaal hai'. Wo polished ad se zyada bikti hai, kyunki log ads pe bharosa nahi karte, logon pe karte hain. Isi liye brands crore ka budget chhod ke aise creators ko paise de rahe hain. Aur badi baat — UGC ke liye followers nahi chahiye. Brand aapki reel apne page ya ads mein daalta hai. Bas achhi video chahiye. Isi liye ye Instagram growth ka intezaar kiye bina shuru ho sakta hai.

Ab video banate hain. Aur samjho — UGC ka 70% khel visuals nahi, script hai. Neha kya bolti hai. Kyunki UGC ka kaam bharosa banana hai, aur bharosa words se banta hai. Kharab script wali sundar video se, achhi script wali simple video zyada bikti hai.

Script formula — teen hisse. Ek — hook, pehle 3 second: ek problem ya bold line, jaise 'agar aapke baal jhad rahe hain to ye dekho'. Do — value ya demo, beech mein: product kya karta hai, kaise use hota hai, 2-3 line. Teen — call to action, end mein: 'link bio mein hai', 'try zaroor karna'. Chhota rakho — 20 se 40 second.

Ab video. Neha ka lip-sync — wahi Module 3 wali skill — plus product haath mein. 3 chhote clips: hook bolti hui, product dikhati hui, aur end line. Phir VN mein Lesson 14 wale 4 kaam: 9 by 16 ratio, tight cuts, captions har line pe, soft music. Captions UGC mein zaroori — log bina awaaz dekhte hain.

Ab common galti. Log video sundar banate hain par script pe dhyan nahi dete — Neha ratti hui lagti hai, bharosa tootta hai. Rule — pehle script likho, natural bolchaal mein, phir video banao.

Aaj ka kaam — koi ek product chuno, teen-hisse wala script likho, aur ek poori UGC video banao — script se export tak. 30-40 minute.

Agle lesson mein portfolio banayenge — wo set jo brands ko dikhate hi kaam dilata hai. Milte hain agle lesson mein.

LESSON 27 — Portfolio Banana SCRIPT · ~3min

Aaj hum portfolio banayenge — 5 videos ka wo set jo brands ko dikhathe hi kaam dilata hai. Video ke end tak aapko pata hoga portfolio mein kya rakhna, kaise rakhna, aur kahan rakhna hai.

Pehle samjho portfolio hi sab kuch kyun hai. UGC mein followers nahi chahiye — to brand aap pe bharosa kis cheez se karega? Ek hi cheez se — aapka kaam. Portfolio aapka resume hai, degree hai, interview hai, sab ek saath. Brand 2 minute mein portfolio dekhta hai aur decide karta hai kaam dena hai ya nahi.

Portfolio mein kya rakhna. 5 videos, alag-alag taaki aapki range dikhe. Do testimonial — Neha product use karke bharose se baat kar rahi, jaise ek asli customer. Do demo — product kaise kaam karta, unboxing ya use karke dikhana. Aur ek different niche ka — taaki brand samjhe aap sirf ek cheez nahi, kai type ka product handle kar sakte ho. In paanchon mein alag products, alag looks, par ek hi quality.

Ab quality ki baat — sab videos ek jaisi high standard ki hon. Ek bhi kamzor video poore portfolio ki value girati hai. 5 achhi, 10 average se behtar hain. Har video mein wahi 4 kaam — sahi ratio, tight cut, captions, music.

Kahan rakhna. Ek jagah jo brand ko ek link se sab dikha de. Sabse aasan — ek Google Drive folder, ya ek simple portfolio page, ya Instagram pe ek highlight. Link ready rakho taaki jab brand maange, turant bhej sako. Naam aur ek line — 'UGC creator, product videos jo bikti hain' — upar likho.

Ab common galti. Log kaam milne ka intezaar karte hain phir portfolio banate hain. Ulta hai. Portfolio pehle banao — apne khud ke ya kisi bhi product ke saath — taaki jab client aaye, dikhana ready ho. Bina portfolio ke koi serious brand baat nahi karta.

Aaj ka kaam — 5 videos plan karo: 2 testimonial, 2 demo, 1 alag niche. Aaj se ek-ek din mein banao, jaldi nahi. Sab ek folder ya page pe rakho, link ready. Agar pichle lesson wali ek video hai, wo pehli mein daal do.

Agle lesson mein brands tak pahunchna — portfolio ko sahi logon tak le jaana. Milte hain agle lesson mein.

LESSON 28 — Brands Tak Pahunchna SCRIPT · ~3min

Aaj hum brands tak pahunchne ka pura system banayenge. Portfolio ready hai — ab use sahi logon tak le jaana hai. Video ke end tak aapke paas 3 raaste honge, ready messages honge, aur roz ka outreach routine.

Pehle ek soch theek karo. 'Brand' sunte hi dimag mein bade naam aate hain jinke TV ads chalte hain. Wahan mat jao — unke paas agencies hain. Aapka market alag aur bahut bada hai — chhote aur medium brands. Instagram pe bikne wale skincare, naye gadget, kapde, food, supplement brands. Inko content chahiye, budget chhota hai, aur ye aap jaise creators dhundh rahe hain.

Teen raaste. Ek — Instagram DM. Aise brands dhundho jinke ads chalte hain par content simple hai. Unhe DM karo. Do — email. Brand ki website pe aksar contact ya collab email hoti hai, wahan professional pitch bhejo. Teen — collab platforms aur brand ke 'creators wanted' posts, jahan brands khud creators maangte hain.

Message ka formula wahi — chhota, unke baare mein, aur seedha. Pehli line unke product ka zikr ya tareef. Doosri — aap UGC creator ho jo aise videos banate ho jo bikti hain. Teesri — portfolio link, aur ek chhoti offer, jaise 'ek sample video bana ke bhej doon?'. Sample offer sabse taakatwar — kaam dikhega to baat aage badhegi.

Number ka खेल. Roz 5 brand DMs aur 2 emails. Hafte mein 35-40 approach. Ismein se kuch jawab denge, kuch mein deal banegi. Ek 'na' ya no-reply normal hai — routine banao, mood pe mat chhodo. Aur follow-up karo — 3-4 din baad ek polite reminder, kyunki zyada deals follow-up mein banti hain.

Ab common galti. Log ek dum bade brand ko pitch karke, jawab na aane pe demotivate ho jaate hain. Ya sabko ek copy-paste bhejte hain. Rule — chhote-medium brands target karo, har message thoda personal, aur consistency rakho.

Aaj ka kaam — 15 chhote-medium brands ki list banao jinko content chahiye. Aaj 5 ko DM aur 2 ko email bhejo, portfolio link ke saath. Ek ke liye ek sample video bana ke bhejo. Aaj se roz ye routine.

Agle lesson mein deal close karna — jab brand haan bole, rate aur payment ka pura system. Milte hain agle lesson mein.

LESSON 29 — Deal Close Karna SCRIPT · ~3min

Aaj wo lesson hai jahan mehnat paise mein badalti hai. Brand ka jawab aa gaya — 'haan, interested hain, rates batao.' Ab kya? Video ke end tak aapke paas UGC ka rate card hoga, negotiation ke jawab honge, aur payment ka system.

Pehle samjho deal close karna alag skill hai. Bahut log yahan tak pahunch jaate hain aur yahin haar jaate hain. Brand ne rate pucha, inhone ghabra ke kuch bhi bol diya — ya itna kam ki mazdoori ban gayi, ya bina soche itna zyada ki brand bhaag gaya. Dono se bachna hai.

Rate card. Photos ki tarah, UGC bhi packages mein bech. Ek video ka rate mat socho, package socho. Basic — ek video, ek revision. Standard — 2-3 videos, alag hooks, thodi zyada value. Premium — videos ka set, plus alag versions alag platform ke liye. UGC ke rate photos se zyada hote hain kyunki video mehnat aur bharosa dono zyada deti hai. Shuru mein ek video teen se pandrah hazaar ke beech, package ke hisaab se; naam banne pe zyada.

Negotiation ke jawab. Brand 'zyada hai' bole — daam mat girao, scope girao. 'Is budget mein main ek video de sakti hoon 2 ke bajaye.' Value bachi rehti hai. Brand 'pehle free karke dikhao' bole — portfolio hai isi liye; ek naya free full kaam mat do, zyada se zyada ek chhota sample. Aur usage clear karo — video kahan chalega, kitne time. Ads mein lambe use ka zyada charge banta hai.

Payment ka rule — advance. Aadha kaam se pehle, aadha delivery pe. Naye brand ke saath ye zaroori. Payment method aur date likhit mein — ek chhota message hi confirmation hai. Bina advance kaam shuru mat karo.

Ab common galti. Excitement mein log usage rights, revisions, aur advance ki baat kiye bina 'haan' bol dete hain — baad mein brand free mein extra kaam nikalta hai. Rule — deal se pehle teen cheezein clear: kitne videos, kitni revisions, aur usage. Sab likhit mein.

Aaj ka kaam — apna UGC rate card banao, teen packages ke saath. Phir teen aam sawalon ke jawab likho — 'zyada hai', 'free karke dikhao', 'kitne time ke liye use kar sakte'. Ready rakho taaki brand puchhe to turant bhej sako. 20 minute.

Agle lesson mein deal ke baad ka kaam — brand ke saath aise kaam karna ki wo baar baar wapas aaye. Milte hain agle lesson mein.

LESSON 30 — Brand ke Saath Kaam SCRIPT · ~3min

Aaj Module 6 ka last lesson. Deal ho gayi, advance aa gaya — ab kaam shuru. Aur aaj wo sikhaungi jo rate card se zyada kamai badhata hai — brand ke saath aise kaam karna ki wo baar baar wapas aaye. Video ke end tak delivery se repeat deal tak ka system hoga.

Pehle ek hisaab. Naya client laane mein kya lagta hai — 50 messages, 2-4 hafte, mehnat. Purane client se doosri deal lene mein — ek message. Isi liye asli paisa naye clients mein nahi, purane ko rokne mein hai. Ek khush brand saal bhar kaam de sakta hai.

Delivery ka tareeka. Ek — time pe do, balki thoda pehle. Deadline se pehle delivery brand ko yaad reh jaati hai. Do — jo promise kiya usse thoda zyada do. Ek extra angle, ek chhota bonus clip. Isi ko 'expected se upar' kehte hain, aur yahi repeat deal banata hai. Teen — file saaf aur ready format mein do: sahi size, sahi name, ek folder mein. Brand ko crop ya rename na karna pade.

Revisions ko sahaj lo. Brand chhota change maange to jhagda mat karo — jitni revisions deal mein thi, khushi se do. Par unlimited free changes se bacho — isi liye pehle se revisions ka number tay kiya tha. Professional wahi jo feedback ko bina ego ke leta hai.

Repeat deal maangna. Kaam pasand aaye, tab hi — delivery ke baad ek chhoti line: 'agar aur content chahiye ho to main ready hoon, aur ek monthly package bhi de sakti hoon.' Yahin se ek baar ka client mahine ka client ban jaata hai. Monthly retainer — fixed videos har mahine, fixed paisa — ye business ki sabse stable kamai hai.

Ab common galti. Log ek deal पूरी karke गोट tab ho jaate hain, phir naye client dhundhte rehte hain. Ye ulta chakkar hai. Rule — har delivery ke baad relationship banao, feedback maango, aur agla kaam ya monthly package offer karo.

Aaj ka kaam — apni ek delivery checklist banao: time se pehle, ek extra value, saaf files ready format mein. Aur ek chhota 'repeat / monthly' message template likho jo delivery ke baad bhejna hai. Ready rakho. 20 minute.

Agle lesson se aakhri Module 7 — Monetization aur Scaling. Ab wo streams jinme client ki zaroorat hi nahi. Milte hain agle lesson mein.

MODULE 7 — Monetization & Scaling

LESSON 31 — Affiliate Marketing SCRIPT • ~3min

Aaj se aakhri module — Monetization aur Scaling. Ab tak do income chal padi — product shoots aur UGC. Dono mein client chahiye. Aaj se wo streams kholenge jinme client ki zaroorat hi nahi. Pehla — affiliate marketing. Video ke end tak samjhoge ye kaise kaam karta hai aur Neha isse kaise kamayegi.

Pehle affiliate simple bhasha mein. Aap kisi product ka special link share karte ho. Koi us link se khareedta hai, to aapko commission milta hai — bina kuch bech, bina stock, bina delivery. Sirf recommend karo. Amazon, Flipkart, Myntra, aur bahut brands ke apne affiliate programs free mein join kiye jaate hain.

Ye aapke liye perfect kyun hai. Neha already products dikhati hai — bas ab link jod do. Ek reel jo already banti hai, wo ab kamai kar sakti hai bina kisi client ke. Ek baar video banti hai, aur mahinon commission deti rehti hai. Isi liye ye 'sote hue' kamai hai.

Kaise shuru karo. Ek — koi affiliate program join karo, Amazon Associates sabse aasan. Do — apne niche ke products chuno jo Neha naturally recommend kar sake — fashion, skincare, gadgets. Teen — content banao jo product ko value ke saath dikhaye: '5 monsoon fashion must-haves', 'ye 3 skincare products kaam karte hain'. End mein link bio ya comment mein. Trust wali video hi bikti hai — jhoothi tareef se log ek baar aate hain, phir chhod dete hain.

Kahan link daalo. Instagram bio mein ek link tool jahan saare links rahein; reel ke caption aur comment mein; aur stories mein swipe/link sticker. Jitni jagah link, utni chance.

Ab common galti. Log har cheez ka link thok dete hain — banda samajh jaata hai ye sirf paise ke liye keh rahi hai, bharosa tootna hai. Rule — wahi recommend karo jo sach mein achha ho aur niche mein fit ho. Kam links, zyada bharosa, zyada sale.

Aaj ka kaam — ek affiliate program join karo. Apne niche ke 3 products chuno. Ek video plan karo jo in products ko value ke saath dikhaye, link ke saath. 25 minute.

Agle lesson mein apna khud ka digital product banana aur bechna. Milte hain agle lesson mein.

LESSON 32 — Apna Digital Product SCRIPT · ~3min

Aaj kamai ki seedhi ka agla kadam — apna khud ka product banana aur bechna. Digital product. Video ke end tak pata hoga kya banana, kaise, aur Neha usse kaise bechegi.

Pehle samjho digital product kya hai. Aisi cheez jo ek baar bane aur baar baar bike — bina factory, bina stock, bina delivery boy. Jaise ek PDF guide, checklist, ya template pack. Ek baar mehnat, phir har sale pura munafa. Affiliate se farak — yahan commission nahi, poora paisa aapka, aur product bhi aapka.

Kya banao. Wahi jo aap already jaante ho. Aapne ye course karke ek skill banayi — wahi becho. Kuch example: ek 'AI influencer kaise banaye' short guide, ek 'product photography prompts' pack, ek 'Instagram content calendar' template, ya 'UGC script templates'. Aapka pehla digital product wahi ho jo aapke followers ya sellers ki ek problem hal kare. Chhota rakho — ek kaam achhe se karne wala guide, 100 page ki kitaab nahi.

Kaise banao. Content aap jaante ho — bas use saaf format mein rakho. Ek simple PDF ya notion page. Cover achha ho, andar clear steps. Zyada design ki zaroorat nahi — value se bikta hai.

Kahan aur kaise becho. Ek simple payment link ya ek chhoti site jahan log paise deke download karein. Neha ise apne content se beche — reels jo problem dikhayein aur guide ko hal batayein, stories, aur bio link. Aur pricing — chhota rakho shuru mein, taaki pehle log khareedein aur review dein. Reviews aane pe daam badhao.

Ab common galti. Log perfect banane ke chakkar mein mahine laga dete hain, aur launch hi nahi karte. Rule — chhota banao, jaldi launch karo, feedback lo, phir improve karo. Bika hua adhura, na bike hue perfect se behtar hai.

Aaj ka kaam — ek digital product ka idea likho jo aapke logon ki ek problem hal kare. Uski outline banao — kya-kya andar hoga. Aur ek reel plan karo jo is product ko bechne ke liye ho. 25 minute.

Agle lesson mein faceless business model — apni AI influencer ko kisi business ka brand face banana. Milte hain agle lesson mein.

LESSON 33 — Faceless Business Model SCRIPT · ~3min

Aaj ka lesson un logon ke liye sabse keemti hai jinke paas already koi business hai — dukaan, online store, koi bhi kaam. Aur jo naye hain, unke liye future ka naksha. Aaj Neha jaisi AI influencer ko kisi business ka permanent brand face banayenge.

Pehle problem samjho, jo har business owner ki hai. Aaj har business ko Instagram pe dikhna zaroori hai — bina content ke dukaan andheri gali mein hai. Par owner ko na camera pe aana hai, na roz shoot karne ka time hai, na model ka kharcha. Isi liye zyada tar business pages soye pade hain. Aap ek permanent face de dete ho jo roz, saste mein, bina thake content deta hai.

Model kaise kaam karta hai. Ek business chuno — apna ya kisi ka. Uske liye ek consistent character banao jo us brand ka chehra bane. Wahi character roz product dikhaye, offers bataye, tips de, reels banaye. Grahak ko ek pehchana hua chehra dikhta hai, brand insaani lagta hai, aur bharosa banta hai. Business owner ko ek 'content machine' mil jaati hai bina kisi ke camera pe aaye.

Iski kamai do tarah. Ek — apna business ho to khud ka content khud banao, kisi ko paise nahi. Do — doosron ke business ke liye ye service becho: 'main aapke brand ka AI face aur mahine ka content sambhaal loongi.' Ye monthly retainer banta hai — har mahine fixed content, fixed paisa. Ek business owner ke liye ye model ka sapna hai, aur aapke liye stable income.

Kya-kya de sakte ho — product reels, offer posts, festival content, tips aur behind-the-scenes. Lesson 15 wale formats aur Module 5-6 wali skills yahan seedha kaam aati hain. Ek business ke liye poore mahine ka content ek baithak mein plan ho jaata hai.

Ab common galti. Log soch lete hain ye sirf bade brands ke liye hai. Ulta — chhote local business, jinke paas na time na budget, aapke sabse aasan client hain. Rule — chhote se shuru karo, ek business ka face bano, result dikhao, phir aur pakdo.

Aaj ka kaam — ek business chuno, apna ya aas-paas ka. Uske liye ek brand-face character aur ek mahine ka content plan sochno — kaunse formats, kitni posts. Ek pitch line likho jo ye service beche. 25 minute.

Agle lesson mein scaling — ek se zyada AI influencers chalana. Milte hain agle lesson mein.

LESSON 34 — Multiple Influencers SCRIPT • ~3min

Aaj scaling ki asli baat — ek se zyada AI influencers chalana. 2-3 characters ek saath. Video ke end tak samjhoge kab doosra character banana hai, kaise chalana hai, aur ek insaan पूरी agency kaise ban jaata hai.

Pehle samjho matlab kya hai. Neha fashion mein hai. Ab socho ek doosra character — Kabir, tech aur gadgets wala. Aur teesra — Riya, fitness wali. Teen characters, teen niches, teen audiences. Ek aadmi ke andar teen creators. Har ek apni kamai laata hai — apne brands, apne affiliate, apna content.

Doosra character kab banana. Jab pehla set ho jaye — Neha ka content, clients, aur system chal raha ho. Pehle ek ko chalana seekho, phir doosra. Ek saath teen shuru karne se teeno adhoore rahenge. Ek pakka ho, tab agla.

Naya niche kaise chuno. Wahi jahan paisa aur demand ho, par aapke pehle se alag. Tech, fitness, food, travel, gaming — sab ke apne brands aur audience hain. Ek character ek niche pe pakka rahe, ghalmel mat karo. Har character ka apna face, naam, style, aur voice — bilkul Neha ki tarah consistent.

System se chalao, mehnat se nahi. Yahi asli trick hai. Har character ke liye wahi process — character sheet, content bank, formats, schedule. Ek baar template ban jaye, doosra character usi template pe chalta hai, aadhe time mein. Batch mein kaam karo — ek din sab characters ke photos, ek din videos, ek din editing. Isi tarah ek insaan agency jaisa output deta hai.

Kamai kaise badhti. Ek character se product shoots, UGC, affiliate, aur brand-face — chaar streams. Teen characters se wahi chaar, teen guna. Par kharcha aur time utna teen guna nahi badhta, kyunki system same hai. Isi liye scaling se munafa tez badhta hai.

Ab common galti. Log josh mein 3-4 characters ek saath shuru kar dete hain, sab average rehte hain, koi kamai nahi. Rule — ek ko winner banao, uska system pakka karo, phir agla. Quality pehle, quantity baad mein.

Aaj ka kaam — agar pehla character set hai, to doosre ka plan banao: naya niche, naam, style. Agar pehla abhi chal raha hai, to uske system ko likhit mein pakka karo taaki aage copy kar sako. 20 minute.

Agle lesson mein sabko jodkar ek monthly income system, aur aage ka poora roadmap. Milte hain agle lesson mein.

LESSON 35 — Monthly Income System + Roadmap SCRIPT · ~3min

Aaj wo karenge jiske liye ye pura course bana. Ab tak paanch kamai ke raaste khole — aaj sabko jodkar ek monthly income system banayenge, aur aage 6 mahine ka roadmap doongi. Video ke end tak ek page ka pura hisaab hoga.

Pehle apni paanchon streams gin lo. Ek — product shoots, Module 5 wali, sellers ke liye photos, package ke daam. Do — UGC videos, Module 6 wali, brands ke liye. Teen — affiliate, bina client, commission. Chaar — apna digital product, ek baar bana ke baar baar bikta. Paanch — faceless brand-face service, monthly retainer. Paanch raaste, alag-alag, taaki ek dheere to doosra chale.

Ab inhe ek system mein jodo. Har mahine ka target rakho — har stream se kitna. Shuru mein sab se thoda; jaise-jaise clients aur audience badhein, target badhao. Sabse stable do cheezein hain — monthly retainers (brand-face aur repeat clients) aur digital product ki passive sale. Inhe badhao, kyunki ye har mahine bina naye client ke aati hain. Ek-baar wale kaam upar se bonus.

Hafte ka rhythm. Kuch din content creation — apne characters ke photos, videos, reels batch mein. Kuch din outreach — naye clients aur brands. Thoda time delivery aur clients ke saath kaam. Aur roz thoda engagement. Ise calendar mein baandh do, mood pe mat chhodo. System chalta hai, motivation nahi.

Aage ka roadmap — 6 mahine. Pehle do mahine: ek character pakka, Instagram 1000 tak, pehle 2-3 paying clients. Teesra-chautha mahine: portfolio strong, monthly retainer shuru, affiliate aur digital product live. Paanchva-chhathva: doosra character, income streams badhao, daam badhao. Har mahine thoda upar — jump nahi, seedhi.

Aur wo galtiyen jo sabse zyada logon ko girati hain. Ek — sab kuch seekhte rehna, karna kabhi nahi. Kaam karo, perfect ka intezaar mat karo. Do — ek do 'na' pe haar jaana. Ye number ka khel hai, chalte raho. Teen — consistency chhod dena. Jo tik gaya, wahi jeet gaya.

Aaj ka kaam — ek page pe apna monthly income system likho: paanch streams, har ek ka target, aur hafte ka plan. Ye aapka business plan hai — samne rakho.

Ye course ka aakhir hai, par aapke safar ki shuruaat. Din 1 pe prompt likhna nahi aata tha — aaj aapke paas consistent character hai, content system hai, aur kamai ke paanch raaste. Ab bas karte jao. Milte rahenge.
